This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

FIFTH ANNUAL REPORT

OF THE

DEPARTMENT OF DOCKS

FOR THE

YEAR ENDING APRIL 30, 1875.

IN BOARD OF ALDERMEN,

July 29, 1875.

DOCUMENT No. 13.

NEW YORK:

MARTIN B. BROWN, PRINTER AND STATIONER,

201, 203 & 205 WILLIAM STREET.

1875.

DOCUMENT No. 13.

BOARD OF ALDERMEN.

JULY 29, 1875.

The following message from his Honor the Mayor, transmitting the Fifth Annual Report of the Department of Docks, was received, laid on the table, and ordered to be printed in document form.

FRANCIS J. TWOMEY,
Clerk.

EXECUTIVE DEPARTMENT, CITY HALL,
NEW YORK, July 29, 1875.

To the Honorable the Common Council:

GENTLEMEN—I herewith transmit for your information a communication from the Department of Docks.

W. H. WICKHAM,
Mayor.

DEPARTMENT OF DOCKS,
NOS. 117 AND 119 DUANE STREET,
NEW YORK, July 21, 1875.

Hon. WILLIAM H. WICKHAM,
Mayor City of New York:

SIR—As required by the provisions of subdivision 9 of section 6 of chapter 574 of the Laws of 1871, and of sections 88 and 119, chapter 335, Laws of 1873, and by direction of the Board governing the Department of Docks, I have the honor to transmit herewith the report of this Department for the year ending April 30, 1875, being its Fifth Annual Report.

Respectfully, your obedient servant,

EUGENE T. LYNCH,
Secretary.

DEPARTMENT OF DOCKS,
NOS. 117 AND 119 DUANE STREET,
NEW YORK, April 30, 1875.

To the Honorable WILLIAM H. WICKHAM,
Mayor of the City of New York:

SIR—In accordance with the provisions of subdivision 9 of section 6 of chapter 574 of the Laws of 1871, the Board of Commissioners governing the Department of Docks submits this report of its transactions from the 1st of May, 1874, to the 30th of April, 1875, being its Fifth Annual Report.

The following-named Commissioners compose the present Board:

JACOB A. WESTERVELT,
SALEM H. WALES, and
WILLIAM BUDD.

The law provides that the report shall contain—

First.—The name, occupation, and compensation of all persons appointed and employed by said Board.

Second.—A statement of the action of the Board for the past year, classified with reference to the various subjects and duties which have engaged the attention of the Board.

Third.—A list of the orders and rules made by said Board, the payments made by said Board, and the purposes and amounts thereof, and the leases made by said Board, for what term, at what rent, to whom, and for what property.

First.

The following is a list of the names and occupation of all persons appointed and employed by the Board, with their respective salaries:

NAME.	OCCUPATION.	SALARY PER ANNUM.
Eugene T. Lynch	Secretary	$4,000 00
William W. Burnham	Bookkeeper	5,000 00
William M. Whitney	Chief Clerk	3,000 00
Lewis A. Jackson	Assistant Secretary	2,500 00
John R. Richardson	Collection Clerk	2,500 00
Jacob Ramsay	do do	2,500 00
John M. Costa	do do	2,500 00
James R. Swartwood	do do	2,500 00
William McConkey	Superintendent of Docks	2,000 00
George W. Lynch	do do	2,000 00
John Richardson	do do	2,000 00
John Makewen	do do	2,000 00
William B. Finley	do do	2,000 00
Thomas Brown	do do	2,000 00
James Fitzpatrick	do do	2,000 00
Thomas McDowell	do do	2,000 00
John M. Smith	do do	2,000 00
George W. Sterritt	Assistant Bookkeeper	2,000 00
Otto H. Klumm	Clerk to Auditing Committee	1,500 00
Joseph T. Kelly	Temporary Clerk	per mo. 150 00
[illegible] Early	Messenger	1,000 00
[illegible] S. Hunt	do	per day 1 66⅔
[illegible] F. Cosgrove	do	" 8 33⅓
[illegible] Hynes	Night Watchman	" 2 50

OFFICE OF ENGINEER-IN-CHIEF.

NAME.	OCCUPATION.	SALARY PER ANNUM.
Charles K. Graham	Engineer-in-Chief	$5,500 00
John Mechan	First Assistant Engineer	4,000 00
John D. Van Buren, Jr.	Assistant Engineer	3,000 00
William W. McClay	do do	2,500 00
Charlton B. Kid	do do	2,500 00
Thomas Murphy	Superintendent of Construction	2,500 00
James Guthrie	Superintendent of Construction	2,500 00
Patrick White	Foreman of Dock Builders	2,000 00
Schuyler Hamilton	Superintendent of Department Yards	2,500 00
William N. Radenhurst	Inspector	2,000 00
Robert P. Staats	Surveyor	1,500 00
David T. Keiller	Draughtsman	1,800 00
Thomas Pickering	Superintendent Floating Property	2,500 00
William O. Stoddard	Clerk	2,000 00
Thomas McCarthy	Keeper of Tools	per day 3 00
Joseph Conway	Inspector of Dredging	500 00

From and after May 1, 1874, the salaries of the following-named employees increased to the sums opposite each name respectively, to wit:

Thomas Pickering, Superintendent of Floating Property, to $2,500 per annum.

Alfred J. Murray, Assistant Superintendent of Repairs and Supplies, to $2,500 per annum.

James Guthrie, Assistant Superintendent of Repairs and Supplies, to $2,500 per annum.

Warren Rosevelt, Assistant Superintendent of Repairs and Supplies, to $2,500 per annum.

Patrick White, Foreman of Dock Builders, to $2,000 per annum.

Robert P. Staats, Surveyor, to $1,500 per annum.—May 19, 1874.

Charlton B. Kid, Draughtsman, promoted to Assistant Engineer (Mechanical), at a salary of $2,500 per annum, from May 1, 1874.—May 19, 1874.

William N. Radenhurst, Draughtsman, to be rated as Inspector, at a salary of $2,000 per annum, from December 1, 1874.—December 8, 1874.

John Turner, Superintendent of Repairs and Supplies, Warren Rosevelt, Assistant Superintendent of Repairs and Supplies, removed from and after February 1, 1875, for the reason that their services are no longer required.

William McConkey, George W. Lynch, John Makewen, William B. Finley, Thomas Brown, James Fitzpatrick, Thomas McDowell, and John M. Smith, Superintendents of Docks, salaries reduced from $2,500 to $2,000 per annum, to take effect February 1, 1875.—January 21, 1875

Thomas Murphy, Superintendent of Construction, salary reduced from $3,000 to $2,500 per annum. Louis A. Jackson, Assistant Secretary, salary reduced from $2,500 to $2,000 per annum, to take effect February 1, 1875.—January 21, 1875.

Joseph Conway, Inspector of Dredging, removed, to take effect February 1, 1875.—January 21, 1875.

Otho H. Klemm, appointed Clerk at a salary of $1,500 per annum, to date from January 18, 1875, and appointed Clerk to Auditing Committee, to date from January 21, 1875.—January 21, 1875.

Joel H. Barlow, Draughtsman, removed, to take effect March 1, 1875.—January 21, 1875.

Alfred J. Murray, Superintendent of Construction, dismissed the service of the Department.—March 4, 1875.

Seth C. Douglass, Assistant Clerk, resigned, to take effect March 27, 1875.—March 25, 1875.

Joseph Conway, appointed Inspector of Dredging at a salary of $500 per annum, to take effect April 1, 1875.—April 19, 1875.

Louis A. Jackson, Assistant Secretary, salary increased to $2,500 per annum, to take effect April 1, 1875.—April 22, 1875.

Schuyler Hamilton, Superintendent of Department Yards, resigned, to take effect May 4, 1875.—April 29, 1875.

Second.

The Board submits the following statement of the subjects and duties which have engaged its attention during the year ending April 30, 1875 :

Annual election for officers of the Board held in compliance with the by-laws, and Commissioner WESTERVELT re-elected President, and Commissioner BUDD, Treasurer, for the ensuing year.

President WESTERVELT appointed Standing Committees for the ensuing year, as follows :

Executive Committee.

Commissioner GARDNER,
" BUDD.

Auditing Committee.

Commissioner GARDNER,
" BUDD.

—May 1, 1874.

SALEM H. WALES, appointed Commissioner of Docks by his Honor S. B. H. VANCE, December 11, 1874, to fill the vacancy caused by the death of WILLIAM GARDNER, December 4, 1874, appeared and presented to the Board his certificate of appoint-

ment, and stated that he had duly qualified as such Commissioner, and was prepared to enter upon his duties, and thereupon took his seat as a member of the Board of Docks.—December 14, 1874.

The PRESIDENT, by virtue of the power conferred by the by-laws, appointed Commissioner WALES as Chairman of the Executive Committee and Auditing Committee, made vacant by the death of Commissioner GARDNER.—December 14, 1874.

Commissioner WALES tendered his resignation as Chairman of Auditing Committee, which was accepted, and Commissioner BUDD appointed to fill the vacancy.—January 21, 1875.

Draft of the by-laws of the Board, rules for employees and regulations for piers and bulkheads, submitted by the Committee appointed December 18, 1874, to revise the same; adopted, except that portion relating to floating property, on which action was suspended.—January 21, 1875.

All previous by-laws, orders or regulations heretofore adopted by the Board of Docks, rescinded and annulled, and the by-laws, rules and regulations adopted this day, to hereafter govern the proceedings of the Board, and a sufficient number ordered to be printed for reference and distribution.—January 21, 1875.

Officers heretofore known as Assistant Superintendents of Repairs and Supplies, be and are hereby designated Superintendents of Construction.—January 21, 1875.

Article VIII. of the by-laws, in relation to the floating property of the Department, upon which action was suspended January 21, 1875, accepted and adopted in accordance with report of Committee on Revision of By-laws.—March 25, 1875.

II.—Improvement of the Water-front.

At the date of the last Annual Report of the Department, the new stone pier, known as Pier No. 1, North river, had been completed for a distance of 100 feet, comprising four arches, and during the past year the work has been steadily carried forward, resulting in the construction of six additional arches, leaving 10 arches still to be finished, in order to carry the pier out to its full length of 500 feet, as laid down on the new plans adopted by the Department.

The policy of the Department in constructing this stone pier has called forth frequent criticisms in the public journals, as well as from those interested in the improvement of the water-front of the city; and in some quarters an impression has prevailed that this pier was the first of a series of similar granite structures to be built by this Department upon the North and East rivers.

It is proper, in this connection, to state that it has never been the intention of this Department, since its organization, to build upon this plan any other pier than the one referred to, except, should it be deemed expedient upon its completion, to erect on the East river, at or near the foot of Whitehall street, one similar in construction.

The Department, after five years' experience in the work of improving the water-front of the city, is well satisfied of the expediency of building the bulkhead wall of concrete and granite, the latter from low water upward, and has continued this method of construction during the past year along the North river water-front.

Pier No. 1, North river, being of the same durable materia[illegible] that composing the bulkhead wall, would present, it w[illegible]s

believed, a suitable and proper finish for the termination of the wall at that most prominent point of the city.

The cost of the pier when finished will not exceed the original estimate, and, notwithstanding the large outlay attending its construction, it is not doubted that it can be leased at a price which will return to the city annually an amount greater than the interest on its cost.

Work has been steadily prosecuted at what is known as the Christopher street section, resulting in the completion of new Pier No. 43, 568 feet in length and 50 feet in width; and of new Pier No. 47, 215 feet in length and 50 feet in width—75 feet of the outer end of the latter pier being supported by columns.

The bulkhead wall from which these piers spring has been finished for a distance of 1,115 feet.

New Piers Nos. 44 and 45 have been completed and connected with the wall, and the outer and inner ends of Pier 46 finished.

In this work it became necessary to construct a temporary approach until the wall should be finished (of 475 feet in length, containing an area of 27,210 square feet), in order to connect Piers 46 and 47 with West street.

Three box-sewers were constructed out to the new bulkhead wall—one from West Tenth street, one from Christopher street, and one from Barrow street.

A large platform on piles has also been constructed between new Piers 43 and 44, North river, containing an area of 27,166 square feet, for the use of the Christopher Street Ferry, the premises having been leased to the Hoboken Land and Improvement Company.

The filling in of the space between the new bulkhead wall and West street has been performed without expense to the city,

private parties availing of the privilege of depositing suitable material for the purpose, free of charge.

Work was commenced on the construction of the bulkhead wall at the King street section, on November 16, 1874, and is being pushed rapidly forward, 147 feet having been finished to present date.

The work at the Canal street section has embraced the construction of new Pier No. 34, 583 feet in length by 90 feet in width.

The work on the pier was commenced May 4, 1874, and on the 1st of September following the Pacific Mail Steamship Company, who became lessee of the pier, were in occupation.

The bulkhead wall adjacent has been finished for a distance of 110 feet, and 80 feet additional is now ready for the stone facing, and for a length of 60 feet piles have been driven, and are ready for the placing of concrete.

A new pier on piles, 135 feet in length by 50 in width, has been built at the foot of Jane street, North river, affording much needed wharf accommodations at that point.

You are respectfully referred to the annexed report of the Engineer-in-Chief for the details of this work.

Certain portions of the water-front on the North river, belonging to the city and occupied under leases by prominent steamship lines, being required by the Department for the work of construction under the new plans, it became necessary before the premises occupied by them could be surrendered, to prevent great inconvenience and loss, that suitable wharf accommodations in the vicinity should be provided for the transaction of their business.

In order that the said steamship companies should suffer

imum of inconvenience to their business in transferring
rminal quarters, new Piers 43 and 46, North river, have
served and set apart for the temporary use of such com-
s were occupying wharf property needed by the Depart-
the prosecution of its work.

n the completion of the piers it was essential that sheds
be erected upon them for the shelter and protection of
idise received there, and the Department accordingly
proposals, and entered into contracts for the erection
ese piers of substantial sheds, affording not only ample
venient accommodation for the business of such steam-
npanies as might be transferred there, but presenting a
t least equal to similar structures erected by private

ortion of the Department Yard at Gansevoort street, not
equired for the manufacture of beton blocks, has been
rred to the control of the Commissioners of the Sinking
nd may, when leased for private purposes, be a source of
e to the city.

Department Yards at East Seventeenth street and Ganse-
reet, North river, have been fitted up with all necessary
iences for the reception and delivery of material, tools,
th storage capacity for nearly 9,000 barrels of cement;
eet of portable railway has been provided, by which
locks of granite and other material are easily and econom-
noved as desired, thereby saving a large amount of labor
ore necessary.

e tugs, pile-drivers, and dredging machines belonging to
partment have been constantly employed during the past
t the different works under construction, and are now, with
rifling exceptions, in good and serviceable condition.

e Department has added, during the past year, four deck-

scows and the tug-boat "Manhattan," the latter being of sufficient power to render unnecessary the hire of additional tugs in moving large derricks, etc.

A large number of the slips on both the East and North rivers have been dredged, affording increased accommodation to the shipping of the port, and, in carrying out the work under the new plans, the dredges have been necessarily constantly at work.

The work performed during the past year amounts to 262,550 cubic yards of mud excavated, and 12,311 tons of stone removed.

On the 1st of February, 1875, the position of Superintendent of Repairs and Supplies was abolished, and all work of repairing and extending the old piers and bulkheads was placed under the charge of the Engineer-in-Chief of the Department.

The work embraced under this head during the past year is as follows:

Piers rebuilt on the North river:

Pier at the foot of Thirty-fourth street, 40x337 feet rebuilt; widened on south side 20 feet, extended 244 feet 6 inches, making the pier 60x581 feet 6 inches.

Piers rebuilt on the East river:

Pier No. 43, 42x352 feet rebuilt, straightened and three blocks removed.

Pier No. 55, 44x164 feet rebuilt, extended 44x65 feet making pier 44x226 feet; also, nine spring piles and three fender piles driven, and shoot for steamboat landing built.

Pier No. 56, rebuilt 38x253 feet.

Piers which have been extensively repaired:

On the North river:

Pier No. 20, repaired and extended 50x80 feet.

Pier No. 21, repaired and extended 47x80 feet.

Pier at Fortieth street, repaired and sheathed 25x125 feet.

Pier at Forty-sixth street, repaired and sheathed 25x350 feet.

Pier at Fifty-seventh street, repaired and approach sheathed 20x650 feet.

Pier at One Hundred and Fifty-second street, extended 200x60 feet, shoot built and spring piles driven at outer end for steamboat landing.

Pier at One Hundred and Fifty-fifth street, extended 85x48 feet, shoot built and spring piles driven at outer end for steamboat landing.

Pier at Twenty-fourth street, extended 50x50 feet.

On the East river:

Pier No. 4, substructure and surface, 41x171 feet, repaired.

Pier No. 5, repairs to substructure and surface and spring piles driven.

Pier No. 6, repairs to substructure and entire new surface, 40x378 feet, and L 29x57 feet.

Pier No. 7, sheathed 25x300 feet, and piles driven.

Pier No. 40, repaired at outer end, new fenders, spring piles, etc.

Pier No. 41, repaired at outer end, new fenders, spring piles, etc.

Pier No. 37, repaired with spring piles, chocks, and fenders.

Pier at One Hundred and Twenty-fifth street, repairs to substructure, and sheathed 24x250 feet.

The following-named piers have had small repairs:

On the East river:

Pier No. 2, small repairs.
Pier No. 8, small repairs.
Pier No. 19, sheathed 22x85 feet.
Pier No. 21, small repairs and fence built 12 feet high, 290 feet long, to prevent ingress to ferry rack.
Pier No. 23, sheathed 28x100 feet.
Pier No. 44, small repairs.
Pier No. 46, inner end sheathed 25x150 feet.
Pier No. 48, repaired at outer end.
Pier at Twenty-third street, surface repaired and spring piles driven.
Pier at Twenty-sixth street, surface repaired.
Pier at Twenty-eighth street, new fenders and backing logs.
Pier at Thirty-third street, repaired and spring piles driven.
Pier at Fifty-third street, 125 feet, backing timber, cleats, and other repairs.
Pier at Seventy-ninth street, substructure and surface repaired.
Pier at Eighty-sixth street, small repairs.
Pier at One Hundred and Sixth street, small repairs.
Pier at One Hundred and Seventeenth street, small repairs.
Pier No. 38, a cluster of piles was secured to the end to keep vessels off the old block:

On the North river:

Pier No. 12, small repairs.
Pier No. 22, small repairs.
Pier at Eleventh street, piles and fenders reset and side caps repaired.
Pier at Twenty-fifth street, small repairs.
Pier at Twenty-sixth street, small repairs.
Pier at Twenty-eighth street, outer end sheathed.

Pier at Thirtieth street, surface repaired.
Pier at Forty-sixth street, small repairs.
Pier at One Hundred and Twenty-ninth street, shoot built and spring-piles driven.
Pier at One Hundred and Fifty-fifth street, small repairs.
Pier at Forty-seventh street, small repairs.

The following repairs have been made to the bulkheads:

On the North and East rivers:

Bulkhead at Broome street, East river, 90 feet rebuilt from low water.
Bulkhead at Barrow street, North river, small repairs.
Bulkhead between Gansevoort street and Little Twelfth street, North river, was raised two feet for a length of 733 feet.
Bulkhead at the foot of East Seventeenth street, was repaired and strengthened for a length of 450 feet.
Bulkhead between Piers 45 and 46, East river, small repairs, strengthened, etc.
Platform, 100 feet long, extending out 20 feet, was built against the bulkhead at the foot of One Hundred and Thirtieth street, North river.

The following-named dumping boards have been repaired:

On the East river, at—

Pier No. 37, small repairs.
Pier at Jackson street, small repairs.
Pier No. 61, small repairs.
Pier at Fifth street, small repairs.
Pier at Seventeenth street, small repairs.
Pier at Twenty-second street, small repairs.
Pier at Thirty-eighth street, small repairs.
Pier at Forty-sixth street, small repairs.

On the North river, at—

Pier at Laight street, small repairs.
Pier at Thirty-seventh street, small repairs.
Pier at Forty-seventh street, small repairs.

At Blackwell's Island, three platforms were built of the following dimensions: 51x31½ feet, 43x32 feet, and 41x26 feet, and minor repairs made to other piers.

At Randall's Island, an extension to a pier was built 23 feet long by 74 feet wide. Small repairs have also been made to the piers on this island.

The dock at Castle Garden has been repaired, piles driven, and fenders fastened.

From April 30, 1874, to April 30, 1875, the rents from wharves and bulkheads held under lease, and the daily collections from wharf property not leased, belonging to the city, amount to $575,601.19, as against $469,361.51 the previous year, all of which has been paid into the hands of the City Chamberlain for account of the Commissioners of the Sinking Fund, being an increase of $106,239.68 over the previous year.

Leases for various parcels of wharf property have been disposed of at public auction, and the annual rents obtained therefrom have, in no instance, been less than the amount usually collected by the Department for wharfage accruing thereat.

The subject of granting leases of wharf property for ferry purposes has occupied much time and careful attention on the part of the Commissioners of Docks during the past year, owing to the doubt existing as to the proper authority having jurisdiction in the matter.

Prior to the establishment of the Department of Docks, der the several acts passed in 1870 and 1871, the Commissioners of the Sinking Fund were vested with the authority not

to issue ferry franchises, but the allotment as well of the
f property in the city from which the ferries should run,
here also appears to be a doubt as to the powers of the said
nissioners of the Sinking Fund to issue at all a franchise
ferry, until after the Common Council shall have passed an
ance establishing such a ferry route.

ıder the provisions of the acts referred to, the Depart-
of Docks is vested with the exclusive charge and control
the wharf property belonging to the Corporation of the
f New York, with exclusive and sole power to lease the

s also provided in said acts that when any of the wharves,
ulkheads, and slips constructed in accordance with the
ans adopted shall be open to the public use, that the
of Docks may appropriate any of the same to the sole use
ial kinds of commerce.

the Department is here clearly vested with power to
ny structures built upon the new plans to special kinds
nerce, which would include the business of the trans-
ı of passengers and freight by ferry boats, it would
sonable and proper to assume that it was the intention
egislature to also vest it with like jurisdiction over the
sting piers, bulkheads, and slips, inasmuch as that body
dy given the sole and exclusive charge and control of
rs and bulkheads to the Department.

ous to the date of the last annual report, the Comptroller
ty, by direction of the Commissioners of the Sinking
de application to this Department to be advised of the
ns, and conditions upon which the Department of Docks
se the pier and wharf property belonging to the city,
the ferries for which leases had not been granted, or
re about to expire, and that it was desirable to have
terms, and conditions inserted in the public notices to

be issued, inviting proposals for the leasing of such ferry franchises.

After due consideration, the Commissioners of Docks fixed and determined the amount of annual rent which should be paid by each ferry company for the use of the wharf property occupied by it, and duly advised the Comptroller that when the franchises for said ferries should be disposed of, they should be sold subject to the amount of the annual rent in each case fixed and payable to this Department.

The question having arisen as to the right of a ferry company to operate a ferry from wharf property leased to it by this Department, without obtaining a ferry franchise, it was deemed advisable before the execution of any of such leases, that the subject should be laid before the Counsel to the Corporation, in order that his opinion might be had as to the extent of the powers possessed by the Commissioners of the Sinking Fund and the Department of Docks respectively in the premises, but, up to the date hereof, no opinion has been rendered.

Third.

In compliance with the third provision of said subdivision of section 6, the following is submitted:

I.—A List of Orders and Rules made by the Board, in the order of their adoption.

June 4.—From and after this date the pile-drivers belonging to the Department placed in charge of the Superintendent of Floating Property.

June 12.—Each Assistant Superintendent of Repairs and Supplies, and each foreman in charge of any work, shall hereafter keep, in a book provided for that purpose, a full and com-

plete record, including from whom received, and measurement and weight when practicable, of all material received for the construction of such work, and also of such of said material as may be transferred to other points, and to whom the same is delivered; also, that a report of all material received at, or delivered from, any unfinished work under their charge, be sent to this Board on Monday of each week; and that upon the completion of any such work the book containing the record of the receipt and delivery of material at that point be forwarded to the Secretary of this Board.

June 18.—All superintendents, assistant superintendents, foremen, or any other persons in charge of men in the service of this Department, shall cause the men under their supervision to be mustered four times daily, to wit, at 8 A. M., 12 M., 1 P. M., and at 5 P. M., and note the time and result of the musters in their time-books, said time-books to be sent to the Department every two weeks for comparison with the pay-rolls.

When men are mustered the person in charge shall take such position, so that when each name is called the man answering to the same shall step out and pass by the person calling the roll for identification.

August 7.—That from and after this date all captains and engineers having charge of any property on any of the tugs, dredges, pile-drivers or other floating property of the Department, under Superintendent Pickering, shall be and they are hereby required to record daily on their log-book all material received and labor performed in repairs, or otherwise, on board their respective vessels, and at the end of each month to examine the bills for the same, and, if correct, to certify thereto.

November 18.—The Superintendents of Docks assigned to duty from and after November 23, 1874, as follows:

William McConkey, to district known as No. 1.

John M. Smith, to district known as No. 2.
John Richardson, to district known as No. 3.
William B. Finley, to district known as No. 4.
John Makewen, to district known as No. 5.
Thomas Brown, to district known as No. 6.
Thomas McDowell, to district known as No. 7.
George W. Lynch, to district known as No. 8.
James Fitzpatrick, to district known as No. 9.

December 15.—In all cases where a scow is chartered for the use of the Department, or a tug is hired for towing, the officer or employee in charge of the Department work at which the scow or tug shall be employed, must cause to be recorded in his journal the name of the tug or scow, the day and hour of its arrival and departure, and the point of its destination, unless discharged from further service, and in event of detention caused by the Department, make a proper note thereof, and upon presentation of the bill for the service rendered, shall certify the same as to the time employed, if correct.

December 24.—In all cases where charges are preferred against any person in the employ of this Department, either for dereliction of duty or breach of discipline, such person shall have a hearing before the President, or one of the Commissioners of this Board to be selected by the President, who shall examine into the charges preferred, and report the result to this Board for its final action.

December 24.—The Engineer-in-Chief and Superintendent of Repairs and Supplies authorized to suspend for cause any men of the working force under their respective supervision, and in such cases they shall, without delay, transmit to this Board their reasons for such suspension; but in no case shall any such employee be removed except by the action of this Board.

December 31.—All offices and tally-houses on piers,

which permits have been or may hereafter be granted by this Board, shall be placed on wheels so as to allow of their being easily moved, to accommodate the traffic of the piers upon which they are placed, and to prevent the accumulation of dirt.

January 21.—In compliance with subdivision 6 of section 6, chapter 574, Laws of 1871, the charges for wharfage and dockage of all vessels admitted to any of the piers or bulkheads constructed under the new plans adopted by the Department, be and they are hereby made at the same rates as are now fixed and established by the laws of this State, until otherwise ordered by this Board.

February 4.—No purchases for any material or supplies to be made for the use of the Department, until a requisition therefor is made by the proper officer in charge.

II.—Contracts made by the Board.

To David V. Howell, for furnishing granite for bulkhead or river wall, at 75 cents per cubic foot for coping, and 48 cents per cubic foot for headers and stretchers. Total amount of contract, $33,068.10; expires October 15, 1874.—Dated May 25, 1874.

To Davis Tillson, Agent Hurricane Granite Company, for furnishing granite for bulkhead or river wall, at 71 cents per cubic foot for coping, and 39 cents per cubic foot for headers and stretchers. Total amount of contract, $21,922.30; expires July 1, 1875.—Dated September 30, 1874.

To John L. Burke, for furnishing 269,000 pounds of iron spikes, bolts, bands, and stay-plates, various sizes, from $3\frac{6}{10}$ cents per pound to $4\frac{7}{10}$ cents per pound. Total amount of contract, $10,697; expires April 7, 1875.—Dated October 7, 1874.

To Charles W. Kearney, for furnishing yellow pine timber, sawed 12 inches by 12 inches, to average 40 feet in length, at 33 cents per cubic foot; sawed 10 inches by 10 inches, from 26 to 60 feet in length, 33 cents per cubic foot; hewed 10 to 15 inches square to average 40 feet in length, 33 cents per cubic foot; chock pieces, 8 inches by 8 inches, 33 cents per cubic foot. Total amount of contract, $50,655; expires April 13, 1875.—Dated October 13, 1874.

To Watrous & Willson, for furnishing spruce timber and plank; timber sawed 9 to 12 inches square, from 20 to 30 feet in length, at $22 per thousand feet, board measure; plank 3 to 4 inches by 9 to 12 inches, from 20 to 25 feet in length, $22 per thousand feet, board measure. Total amount of contract, $3,869.80; expires April 7, 1875.—Dated October 7, 1874.

To Charles W. Kearney, for furnishing white pine timber, sawed 12 inches by 12 inches, to average 40 feet in length, at 28 cents per cubic foot; hewed 12 to 15 inches square, to average 40 feet in length, 28 cents per cubic foot. Total amount of contract, $6,440; expires April 13, 1875.—Dated October 13, 1874.

To Charles W. Kearney, for furnishing oak plank and fenders, 5 inches by 12 inches and upwards, 15 feet to 45 feet in length, $42.50 per thousand feet, board measure; 5 inches by 12 inches and upwards, 12 feet in length, $42.50 per thousand feet, board measure; 5 inches by 8 inches, 12 feet in length, $42.50 per thousand feet, board measure; oak fenders, 8 inches by 12 inches, 13 feet in length, $42.50 per thousand feet, board measure. Total amount of contract, $5,729; expires April 13, 1875.—Dated October 13, 1874.

To Horace Theall, for making repairs to Steam-dredge No. 1, $5,000; expires November 27, 1875.—Dated October 27, 1874.

To James Brand, for furnishing 7,000 barrels fresh burnt

English Portland cement, at $3.75 per barrel. Total amount of contract, $26,250; expires March 5, 1875.—Dated November 5, 1874.

To James Bigler, for furnishing white or yellow pine, or spruce piles and dock logs; piles, 45 to 60 feet in length, 12 to 15 inches in diameter at large end, and 6 inches at small end, $4.50 each; 55 to 60 feet in length, 12 to 16 inches in diameter at large end, 6 inches at small end, $6.75 each; 65 to 70 feet in length, 13 to 16 inches in diameter at large end, 6 inches at small end, $9 each; spruce or hemlock dock logs, $2.75 each; expires May 20, 1875. Total amount of contract, $44,325.—Dated November 20, 1874.

To James Bigler, for furnishing yellow pine plank, 5 inches by 12 inches, from 25 to 50 feet in length, at $29.90 per thousand feet, board measure; 4 inches to 5 inches by 12 inches and upwards, averaging 40 feet in length, $29.90 per thousand feet, board measure. Total amount of contract, $39,916.50; expires May 20, 1875.—Dated November 20, 1874.

To James Bigler, for furnishing white pine plank, 4 to 5 inches and upwards, to average 40 feet in length, $29.90 per thousand feet, board measure. Total amount of contract, $5,382; expires May 20, 1875.—Dated November 20, 1874.

To Patrick Brady, for furnishing 8,000 cubic yards of sand, at 79 cents per cubic yard. Total amount of contract, $6,320; expires December 9, 1875.—Dated December 9, 1874.

To Charles A. Harrington and John A. Bouker, for furnishing broken and rip-rap stone at $2.40 per cubic yard for broken stone for concrete; $1.50 per cubic yard for broken stone for foundation; 85 cents per cubic yard for rip-rap. Total amount of contract, $52,000; expires December 17, 1875.—Dated December 17, 1874.

To Cobanks & Theall, for making repairs to Steam-dredge No. 2, $8,800; expires April 12, 1875.—Dated March 3, 1875.

To S. L. Merchant & Co., for furnishing 5,000 barrels of Fresh Burnt English Portland Cement, at $3.90 per barrel. Total amount of contract, $19,500; expires June 6, 1875.—Dated March 6, 1875.

To William Tooker and Daniel Daily, for building four deck-scows, at $3,143 each. Total amount of contract, $12,572; expires June 8, 1875.—Dated March 10, 1875.

To Joseph C. Brady, for building shed on new Pier 46, North river, $30,000; expires June 20, 1875.—Dated March 22, 1875.

To Joseph C. Brady, for building shed on new Pier 43, North river, $39,280; expires June 20, 1875.—Dated March 22, 1875.

To Cobanks & Theall, for making repairs to derrick "City of New York," $1,800; expires April 12, 1875.—Dated March 23, 1875.

III.—Payments made by the Board, and the purposes and amounts thereof.

Requisitions have been made by the Commissioners of Docks upon the Department of Finance, for the payment of expenses incurred by the Department from May 1, 1874, to April 30, 1875, amounting to the sum of $1,536,204.33.

By reference to the report of the Treasurer, herewith submitted, a full statement will be found of the payments made by the Board, and the purposes and amounts thereof.

IV.—Leases made by the Board.

To Hoeft, Ficken & Co., of southerly side of Pier No. 1 East river, except the outer end, with privilege of mooring

floating bath thereat, during the summer months of each year, for five years from May 1, 1874, at an annual rent of $1,700.—May 14, 1874.

To Harlem River and Port Chester Railroad Company, of the land under water to be covered by platform extending fifty feet southerly in front of the bulkhead between Piers Nos. 50 and 51, East river, during the pleasure of the Board, at an annual rent of $2,500.—May 7, 1874.

To New York Central and Hudson River Railroad Company, of the land under water belonging to the city, between centre line of Sixtieth street and southerly line of Sixty-fifth street, North river, with privilege to erect two piers, each of a width of eighty feet, for a term of ten years, from August 1, 1874, at $5,000 per annum (contingent the first three years), with the privilege of four renewals of ten years each, the rent for each succeeding renewal to be $1,000 per annum over and above the annual rent paid during the preceding term of ten years; the piers to be removed by the company at the expiration of lease, upon six months' notice from this Department, or else to revert to the city, free of all claim.—Dated June 22, 1874.

To Neidlinger, Schmidt & Co., of land under water belonging to the city, foot of Sixty-third street, East river, for ten years, from June 1, 1874, with the privilege to drive piles and erect a platform, at an annual rent of $250.—May 28, 1874.

To Tripp & Ketchem, 200 feet of the southerly side of the pier foot of Thirty-fourth street, North river, adjoining the bulkhead, as a permanent berth for grain-elevator, at an annual rent of $3,000, during the pleasure of the Board.—June 1, 1874.

To the Erie Railway Company, of the premises now occupied for ferry purposes, at the foot of Chambers street, North river, including the whole of Pier No. 30, North river, and one-half of the bulkhead, and one-half of the slip between said pier and

Pier 31, North river; also the erection on the northerly side of said Pier 30, which originally formed an L; and also the use of the slip on the southerly side of Pier 30, for all the purposes of collecting wharfage that would be enjoyed by the lessee of the pier for commercial purposes for one year from May 1, 1874, at an annual rent of $15,000.

To Pacific Mail Steamship Company, of new Pier No. 34, North river, and 75 feet of bulkhead on each side, for ten years from September 1, 1874, at an annual rent of $45,000; said lease to covenant for the privilege of a renewal for five years at an annual rent of $45,500.—July 23, 1874.

To David Tracy, of pier at foot of Fortieth street, North river, for five years from October 1, 1874, at an annual rent of $4,600.—Dated September 28, 1874.

To R. Cornell White, of Pier No. 37, East river, except portion used as a dumping-board, for five years from May 1, 1874, at an annual rent of $3,000.—October 1, 1874.

To Frederick Hoeft and Richard Ficken, of southerly half of Pier No. 55, East river, except outer end thereof, for five years from November 1, 1874, at an annual rent of $1,700.—November 5, 1874.

To New York Central and Hudson River Railroad Company of east half of Pier No. 4, whole of Pier No. 5, west of Pier No. 6, and the intervening bulkheads, East river, during the pleasure of the Board, at a rent of $11,000 per annum.—January 1875.

To General Transatlantic Company, of new Pier No. 4, North river, when completed under the new plans adopted, the term of ten years, with the privilege of a renewal of years, at an annual rent of $30,000 for said term of ten ye

and $30,500 per annum for said renewal term.—February 18, 1875.

To Dillon Ransom, the privilege of keeping floats for one year from February 1, 1875, at the steps foot of Harlem Bridge, head of Third avenue, at a rent of $780 for the term.—March 25, 1875.

To David Tracy, of pier foot of Twenty-fifth street, East river, for one year from February 1, 1875, at a rent of $1,950 for the term.—March 25, 1875.

Permits have been granted for the use of wharf property as follows:

To New Haven Steamboat Company, to land twice daily at end of pier foot of Twenty-third street, East river, at $75 per month.—May 7, 1874.

To Morrisania Steamboat Company, to occupy and use outer end of Pier No. 55, and of pier foot of Twenty-third street, East river, for one year from May 1, 1874, at $500 per annum each.—May 21, 1874.

To Day Line of Steamers, to use outer end of pier foot of Twenty-fourth street, North river, from June 1 to November 1, 1874, at $1,200 for the term.—May 25, 1874.

To H. F. & C. P. Hunt, to locate a floating bath at south side of pier foot of Thirty-fourth street, North river, during the pleasure of the Board, at $150 per month, from June 1, 1874.—May 28, 1874.

To New Jersey Southern Railroad Company, to use westerly half of southerly side of pier foot of Twenty-fourth street, North river, for three months from June 15, 1874, at $250 per month.—June 2, 1874.

To Sherman & Davis, to use two hundred feet on the north-

erly side, beginning at the outer end of the pier foot of Twenty-fourth street, North river, for three months from June 10, 1874, at $200 per month.—June 12, 1874.

To Sea Cliff Steamboat Company, to land at end of pier foot of Thirty-third street, East river, for one year from June 16, 1874, at a rent of $400.—June 15, 1874.

To Sea Cliff Steamboat Company, to land twice daily at Pier 55, East river, for three months from June 25, 1874, at $75 per month.—June 15, 1874.

To Long Island North Shore Freight and Transportation Company, to use end of pier foot of Thirty-third street, East river, for one year from June 15, 1874, at a rent of $500.—June 15, 1874.

To Stonington Steamboat Company, to land twice daily at end of pier foot of Twenty-third street, East river, for three months from June 22, 1874, at $75 per month.—June 15, 1874.

To Oyster Bay and Huntington Steamboat Company, to land at end of pier foot of Thirty-third street, East river, for one year from June 17, 1874, at a rent of $500.—June 16, 1874.

To Hanfel & Krack, to use part of north half of pier foot of Third street, East river, to moor floating bath, at $150 per month.—June 25, 1875.

To A. J. Blauvelt, the use of the picket fence on the upper side of Pier No. 21, East river, for the term of five years from March 1, 1875, or as long as said fence shall remain for the purpose of displaying advertisements, at an annual rent of $300.—February 25, 1875.

To Morrisania Steamboat Company, to use outer ends of Pier No. 55 and at Twenty-third street, East river, for one year from May 1, 1875, at a rent of $1,000.—April 8, 1875.

To James Gillies, use of land under water, owned by the city, at the foot of Fiftieth street, North river, to be covered by a temporary bulkhead, during the pleasure of the Board, at a rent of $100 per annum. April 15, 1875.

Reductions in rent and allowances of sums due the Department under leases for wharf property have been made as follows:

Harvey P. Farrington, lessee of pier foot of West Eleventh street, granted an allowance of $150 per month during the time he bath occupies berth at upper end of pier.—June 4, 1874.

Oyster Bay and Huntington Steamboat Company granted an allowance of $100, for expense in driving piles at end of pier foot of Thirty-third street, East river.—June 19, 1874.

Long Island North Shore Freight and Transportation Company granted an allowance of $100, for expense in driving piles at end of pier foot of Thirty-third street, East river.—June 19, 1874.

Hoboken Land and Improvement Company, the rent to be paid by said company for premises leased under resolution February 2, 1874, arranged as follows: at the rate of $3,750 per annum from July 1st, until the expiration of the 45 days after the completion of the platform in front of said premises, as provided in said resolution.—July 8, 1874.

To Oceanic Steam Navigation Company, an allowance of $3,750 on rent to be paid November 1, 1874, granted said company consequent upon premises leased not being entirely completed for use.—November 12, 1874.

To Society for Reformation of Juvenile Delinquents, a [illegible]tion of $1,126.12 made in the rent due from said society, [illegible] of pier foot of One Hundred and Seventeenth street,

East river, owing to north side of said pier being set apart an used by the city since January, 1871.—December 24, 1874.

To Wm. H. Brown, an allowance of $168.75 made said part lessee of Piers Nos. 56 and 57, East river, he having bee deprived of the use of said premises while repairs were bein made thereto.—December 31, 1874.

George Brown, lessee of Piers No. 37 and at foot of Fift and Twenty-eighth streets, East river, granted a settlement i full of arrearages of rent due from him upon payment o $3,839.75, the city having had the use of portions of said pie during the term of his lease thereof.—April 29, 1875.

Consent has been given to the transfer of the followin leases of wharf property:

Oceanic Steam Navigation Company granted permission t sublet new Pier No. 44, North river, to Atlas Steamship Com pany.—June 16, 1874.

Jacob Lorillard granted permission to sublet to the Philade phia and New York Navigation Company Piers Nos. 33 and 33 East river.—February 4, 1874.

North Shore Staten Island Ferry Company, granted permissio to sub-let portion of the piers leased by them, foot of Whitehe street, to New York and Staten Island Ferry Company.—Janua 4, 1875.

The following-named leases of wharf property have bee canceled:

John H. Starin, lease of southerly side of Pier No. 22, Nor river, terminated and annulled.—May 1, 1874.

Tripp & Ketchem, permission granted April 30, 1873,

place elevator at pier foot of Twenty-fourth street, North river, terminated and annulled.—June 1, 1874.

James Udall, permission granted August 24, 1871, to use end of pier foot of Thirty-third street, East river, revoked from and after June 15, 1874.—June 9, 1874.

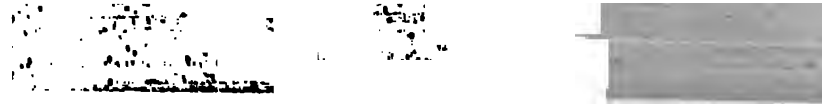
Hoeft, Ficken & Co., lease of south half of Pier No. 55, East river, granted by resolution May 14, 1874, rescinded and annulled. —November 5, 1874.

Mutual Benefit Ice Company, lease of berth at pier foot of Forty-sixth street, North river, surrendered from and after November 1, 1874.—October 22, 1874.

All of which is respectfully submitted.

JACOB A. WESTERVELT, } *Commissioners*
S. H. WALES, } *of Docks.*

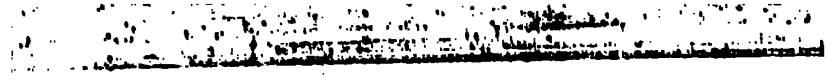
EUGENE T. LYNCH,
Secretary.



REPORT

OF THE

ENGINEER-IN-CHIEF.



NEW YORK, June 1, 1875.

EUGENE T. LYNCH, Esq.,

Secretary of the Board of Docks :

SIR—I have the honor to submit for the consideration of the Board of Commissioners governing this Department the following report of the several works under my supervision, during the year ending April 30, 1875.

Before giving an account of the work performed on the different sections during the year, it has seemed advisable, in order that the Commissioners may have before them the means of arriving at a proper understanding of what has been accomplished, that each separate work should be described from its inception.

New Pier No. 1, North river. This pier, which starts from the bulkhead wall at the Battery, at a distance of about eighty-two feet north of the north point of the tangency of the curve of the wall, was designed by my predecessor, General McClellan, to be five hundred feet in length by eighty feet in width, giving, consequently, an area of forty thousand square feet. Its design is that of a series of semi-circular arches, the first springing from the bulkhead wall, faced on the sides with cut granite, and formed inside with concrete. These arches rest on beton blocks, which are supported by masses of concrete contained in wooden cribs, resting on the bed rock.

The work of laying the foundations of sub-Piers Nos. 1, 2, 1 & 8, was begun in the early part of the autumn of 1872, and

these and the superstructure were completed prior to my appointment in July, 1873.

The nature of the bottom for the first sub-pier, and the short distance at which it was constructed from the rip-rap foundation forming the base of the bulkhead wall, rendered the use of a crib, such as employed for the foundation of the other sub-piers, impossible. The following method was therefore adopted:

The dock silt was first dredged as close to the above mentioned rip-rap foundation as was deemed safe, but, with all the precautions taken, it was with extreme difficulty that enough could be excavated to give a proper bearing to the necessary sub-foundation. Broken stone was then placed on the site, and this was pounded down with an iron rammer, fastened to the end of an oaken pile, worked in the ways of a pile-driver. A wall of dimension stone was then built up, in a series of headers and stretchers, at a fixed distance from the line of bulkhead and at a depth of about thirty feet from mean low water. Inside of this wall more dimension stone was placed irregularly, and the interstices filled up with broken stone. Concrete blocks were then placed, holding iron stanchions so constructed that guide planks were lowered and fixed in them, movable at will to a given level below mean low water, and fastened in place by iron pins. The dimension stone wall was then closed at either end, broken stone placed where necessary, and a trough or basin formed for the reception of the concrete in mass, forming the base upon which the beton blocks, which carried the sub-piers up to the spring or blocks, firmly rested.

The concrete was mixed on scows and lowered into the trough by means of a sloop, rigged with a derrick-boom, in the usual manner. It was dumped by divers, and when brought up to the required "formation level," was smoothly levelled by means of a heavy iron "straight edge," resting on the guide planks. In this manner a hard and even bed was prepared to receive the beton blocks, to be described hereafter.

In preparing the second sub-foundation, a crib was used of 84 feet in length by about 13 feet outside width, firmly braced and bolted together and weighted with rip-rap stone, placed in bins on the sides, spuds for regulating the lowering of material running through iron brackets on either side at regular intervals. The one-hundred-ton derrick held this structure while it was being weighted, and then placed it in position on the bottom. In this crib a canvas bag was firmly fastened to the bottom, and this, when lowered, formed a basin for the reception of the mass concrete, which was then deposited, built up, and levelled in a similar manner to that employed in sub-Pier No. 1. The third, and all subsequent foundations, were made by means of a similar crib, the width varying somewhat, but instead of canvas bags secured to the bottom, planking was used whenever necessary and fastened in place by divers. The use of long spuds was likewise discarded.

Upon the foundations prepared in the manner thus described, base blocks of concrete, made in molds and weighing about twenty-six tons each, were lowered into position by the large derrick, and when the alignment was perfected, pier blocks, varying in height according to circumstances, were placed upon the base blocks, these pier blocks being so made as to allow a "berm" of eighteen inches on either side.

On these pier blocks the "springers" were placed, granite on the outside and concrete within; centres were set and the necessary arching and spandrel walls proceeded with. The hearting and deck of the pier throughout have been formed of pounded concrete, with occasional rip-rap in the hearting.

This system of construction has been generally adhered to since my incumbency in office, and Arches Nos. 5, 6, 7, 8, 9 and 10 have been completed. I had contemplated the idea of employing a wall of "pierre perdu" in place of cribs, having used it successfully in the construction of 84 feet of wall to the

northward of this pier, since my appointment, my intention being to carry this stone wall along the whole extent of the pier and weighting it with three times the amount which it was intended to carry in any probable use. Then, after three or four months, the weighting would be removed, the interstices filled with smaller stones, then laying six inches of concrete and upon that placing the base and pier blocks for the several arches. I am satisfied that this method, giving as it would have done a uniform foundation level, would have been more economical and quite as successful as the present system, but after having made a commencement I desisted, for reasons which it is not necessary to mention, and followed the plan as above stated, as inaugurated by General McClellan.

It is but just to say that the plans for this work were prepared by Mr. Isaac Newton, Engineer in Charge, who supervised its construction until a brief period before my appointment, Gen. McClellan having the most unlimited confidence in his integrity and ability. Mr. Newton also designed and supervised the construction of the large derrick, which was employed so successfully in laying the beton blocks at the Battery and at the Christopher street section.

THE CHRISTOPHER STREET SECTION.

When the Board of Commissioners, by their resolution adopted September 26, 1873, ordered a section of the river wall to be commenced at Christopher street, that part of the water-front extending from Barrow street to Perry street, now occupied by four piers and the old Hoboken Ferry platform, having an aggregate area of 77,460 square feet, and yielding to the city a revenue of $22,775 per annum.

Piers Nos. 51, 52 and 53, originally built in the old style blocks and bridges, many years since, had been widened a

extended as the demand for wharfage facilities in that part of the town increased, without any system or plan except that of satisfying the call of some steamboat or barge owner for accommodation. Four hundred and nine feet of the bulkhead, from Pier No. 51 north, were occupied by oyster scows, around which the filth of the sewers had accumulated, until, at low water, the bottom near the bulkhead was exposed, and at a distance of 160 feet from the bulkhead there was a depth of water varying from only four to six feet.

On the 30th of September, 1873, dredging was commenced between Piers Nos. 51 and 52, to make a trench averaging 60 feet in width, having a mean depth of 20 feet below low water, and continued north and south until it reached a length of 1,300 feet. This work was carried on in close proximity to vessels coming in or going out, discharging and taking in freight, and to which the right of way was always given, adding much to the cost of the work. The amount of dredging done on the section to April 30, 1875, was—in the slips, 29,450 cubic yards; for the bulkhead, 45,615 cubic yards; making a total of 75,065 cubic yards.

To give the public the use of the piers, beyond the established bulkhead line, a temporary bridge was built, 30x254 feet, from the foot of Christopher street along the north side of the ferry slip to the south L on Pier No. 51 (October 14 to November 6, 1873), and another (November 11 to December 4, 1873), from the north L of Pier No. 51 to Pier No. 52, 30 feet wide by 138 feet long.

As soon as the connections were completed, giving a roadway to Piers Nos. 51 and 52, these piers were cut away in the line of the wall.

To provide for the accommodation of the oyster scows, between Piers Nos. 51 and 52, on the 28th of October the work of tearing up old Pier No. 53 was commenced, and was continued

until a sufficient depth of water was obtained, near the bulkhead, to float the scows; and on the 27th of November they were moved into their present quarters.

In front of Pier No. 53, there was then lying in the mud the wreck of an old dry-dock, with a sunken canal boat on what had once been the ways. This dock, after passing chains under the bottom, was lifted from its bed with the large steam derrick, and carried away and beached at Fifty-seventh street, North river.

Shortly after commencing the dredging for the river wall foundation, orders were received to begin the construction of new Piers Nos. 44, 45 and 46, and work was commenced on them December 11, 1873, as follows: On Pier No. 44, at a point about 75 feet west of the bulkhead line; December 16, on Pier No. 45, at a point 80 feet from the bulkhead line, a connection having been built north from old Pier No. 52, 30 by 100 feet; on the 27th of December, Pier No. 46, at a point about 86 feet west of the bulkhead line.

On the 31st of March, 1874, the work of building the new ferry platform was begun, at a point 25 feet west of the bulkhead line, and the driving of piles for new Pier No. 43 was commenced on the 22d of April following.

When the construction of these new works was decided upon, old Piers Nos. 51 and 52 were taken away in portions, from time to time, as they interfered with the progress of the work, until the latter part of March, when they were entirely removed. By the 30th of April the new piers had advanced towards completion, as follows: Pier No. 43, one-eighth; the Hoboken Ferry platform, three-quarters; Piers Nos. 44 and 45, about seven-eighths; and Pier No. 46, three-quarters.

The work of driving piles for the foundation of the river wall was begun January 2, 1874, at a point five feet north of the

south side of new Pier No. 44, and by the 30th of April there had been driven 2,603 piles. February 18, began cutting off these piles at 14.21 feet below mean low water, and by the 30th of April there had been cut off 1,826. March 25, commenced putting down 4-inch stone between the piles cut off, and by April 30 there had been put down 804 cubic yards. On the 13th of April the concreting between the pile-heads was begun, and by April 30 this work had extended over an area of 27½ by 140 feet. By the same date there had been placed in front and rear of the wall 600 cubic yards of rip-rap stone.

Thus, on the 30th April, 1874, work was being prosecuted with vigor on the river wall, on the ferry platform, and on four new piers—241 men appearing on the Department pay-rolls at the Christopher street section. The assistant superintendents and foremen were all capable men, who, having great interest in their work, took advantage of all means in their power to carry out the plans of the Engineer-in-Chief.

The bulkhead wall at this section, 23 feet 10 inches in height, is built on a foundation of piles cut off 14 feet 2 $\frac{7}{16}$ inches below mean low water, filled around the heads with broken stone and concrete, thus making a solid level platform, on which were placed two courses of beton blocks, each six feet high. On the top of these blocks rests a facing of granite masonry backed with mass concrete, for a height of 9 feet 4 inches, or up to the coping, which for the present has been simply backed with earth filling, the coping, with a rise of 2 feet 6 inches, having been left out in the wake of the piers. The lower 12 feet of the wall has a batter of 2¼ inches to the foot, and the granite facing a batter of one inch to the foot.

When the mud had been dredged out, in the line of the wall, to a depth of 20 feet below low water, piles, varying in length from 50 to 76 feet, with the character of the bottom, were driven until they gave an absolute refusal or would not go down

more than 1½ to 2 inches, with 15 feet fall of a 1,700 pound hammer. The bottom changes from the foot of Christopher street, with gravel and sand at a depth of 44 feet below low water, the gravel and sand generally sinking towards the foot of West Eleventh street, where only a moderately tenacious clay was found at a depth of 100 feet. The piles were spaced 2½ feet between centres, north and south and across the wall, except three piles in the row near the toe of the wall, which were placed two feet apart between centres. The wall being 17½ feet wide at the base, the pile foundation extends beyond it 7½ feet in front and 2½ feet in rear, making the foundation 27½ feet wide.

These piles were cut off by a circular saw attached to a sliding frame in the ways of a pile-driver, at a distance of 14 feet 2 1/8 inches below mean low water, and between their heads stones of about 4 inches cube were thrown from the deck of a scow for a depth of from two to six feet, and to within one or two feet of the formation level. This foundation stone did not have the uniform depth of six feet, because such a mass of liquid mud had flowed from all directions into the trench during the time intervening between the driving and the cutting off of the piles.

On the stone thus arranged, and for the purpose of binding the piles together, concrete was placed, made in the proportions, one part cement, two parts sand, and three parts broken stone, from a depth of from one to two feet. This concrete was put down by the aid of divers at first through a "tremie" 12 inches square inside, made of 2-inch pine planks, a mode which, although expeditious, was soon abandoned on account of the washing of the cement, and was replaced by the ordinary triangular bucket, lowered by a hand winch from the deck of a scow.

On the foundation thus prepared, beton blocks, manufactured at the Ganesvoort Street Yard, were lowered by the hundred-ton derrick, and placed accurately in position with the aid of divers.

e in two courses, each course consisting of two front and back, of the following dimensions:

Dimensions.	Contents. *Yds.*	Weight. *Tons.*
.....11′ 6″ and 10′ 4½″x10′x6′	24.36	45.5
..... 7′ 4½″ and 6′ 8″ x10′x6′	15.13	28.3
back... 6′x10′x6′	10.3	24.9

ving been in this manner brought up to within ɜs of mean low water, the first course of granite, ɔ rise of 2 feet 1 inch, was laid. At the same k of the blocks, and within two feet of the edge, old-board of 2-inch spruce, to retain the concrete mold-board was made with a foot, and tempora- position by weighting. Between the first course the mold-board, mass concrete was lowered in in the proportions of one part cement, two parts arts broken stone, until the top of the granite was :he second course of granite was laid and backed ınner. The latter being above water at some le, the concrete was made with a larger propor- e, two, and five), and packed down with rammers.

top of the third course of granite was reached, all 5 feet 10 inches from the beton blocks, the ɜre set in towards the face of the wall 2 feet, the thickness at the top of the course next the ; 4 inches.

ıt the coping was laid, between the piers, in pieces th a rise of 2 feet 6 inches, and in the wake rubble wall 3 feet 3 inches wide by 18 inches to protect the timber of the piers from contact filling.

any lateral movement of the wall, as the work of ton blocks advanced, rip-rap stone was thrown in

the front and rear over a width of 25 or 30 feet, until it came up within an average distance of 10 feet from low water, in front of the wall, and up to the formation level in the rear. This rip-rap has an average depth of 6 to 7 feet.

In the rear of the wall seven rows of piles were driven, 4 feet between centres, to serve as supports for the reception of filling, if brought in large quantities, and for the support of platforms if the filling should be delivered in carts, the main object being to relieve the wall from the severe lateral pressure it would experience when the large amount of filling rendered necessary by the excessive depth and extreme tenuity of the silt should be put in, the intention being to dump on both sides of the platform, the exterior filling to bring a gradually increasing pressure against the wall, and the filling inwards, which was designed to be in the ratio of two to one, to force the mud towards the old bulkhead line, so that it might be gradually surrounded and its power overcome. These piles formed nuclei around which the earth collected, at an angle of about 75 degrees, thus increasing the ordinary angle of slope, which may be taken as about 25 degrees, so that the lateral pressure against the wall was immensely diminished.

The work on the Christopher street section during the year ending April 30, 1875, was as follows:

Dredging for the river wall, cubic yards	30,950
" slips and oyster basin, "	104,022
Total	134,972
Piles driven on 694 feet of foundation	3,625
" " in rear of the wall	1,186
" cut off at the formation level	4,349
Length of foundation concreted, feet	975
Beton blocks laid, May 5 to December 23	438
438 Beton blocks contained, cubic yards	7,234.6
Length of wall laid at the base blocks, feet	1,115
" granite facing, 9 feet 4 inches high, feet	1,080
" " coping "	524.5

Quantity of granite (reported by Asst. Engineer Maclay), cubic feet			30,476.5
Rip-rap stone in front and rear of wall, cubic yards			10,005
Four-inch stone on the foundation,	"		791
Concrete in foundation and wall,	"		3,947
Sand for concrete and mortar,	"		1,920
Cement, " " barrels			6,312

New Pier No. 43 was entirely constructed, with the exception of 81 piles driven before May 1, 1874.

The Hoboken Ferry platform, area 27,166 square feet, was finished, three-fourths of it having been constructed before May, 1, 1874.

New Piers Nos. 44 and 45 were completed and connected with the wall.

Of new Pier No. 46 the outer and inner ends were built and the inner end connected with the wall.

New Pier No. 47, 50x215 feet, was built, 75 feet of the outer end being supported by 36 columns.

A platform, having an area of 27,210 square feet, and 475 feet long on the eastern side, was constructed to connect new Piers Nos. 46 and 47 with West street.

The following temporary structures were built to connect the new piers with the street: A bridge, 40x170 feet, to Pier No. 45; a bridge, 40 feet wide, from the north side of the ferry platform; a bridge from the south side of the ferry platform. These temporary structures were all torn up, in addition to tearing up the slips on the north and south sides of old Pier No. 51, the old ferry platform at the foot of Christopher street, and the pier at the foot of Barrow street.

Three box sewers were built—from the foot of West Tenth street to the wall; from the foot of Christopher street to wall, and from Barrow street, 150 feet south along the old bulkhead.

Deliveries of filling began on the 2d of July, 1874, and

80,093 cart-loads were received. Between January 11 and February 22, 1875, 104 scow-loads of garbage and ashes were received from the Police Department, containing 26,780 cubic yards. The filling now reaches from old Pier No. 52 to about 70 feet south of new Pier No. 43. The money received for dump tickets at this section amounted to $1,080.50.

When the wall was being constructed in front of the ferry platform, in the fall of 1874, it frequently happened that a low tide would not occur during the day-light. In order to take advantage of each tide, and sometimes to finish a course of masonry, with backing up of concrete, to get ready for the next day's work, the wall was illuminated by two calcium lights, placed 40 or 50 feet apart, within a few feet of the work. On the first occasion that this plan was tried, the result was so satisfactory that the day was afterwards often lengthened until past midnight, and sometimes the workmen were enabled to commence at three or four o'clock in the morning, and this at a cost of about three dollars per hour, a trifling expense compared with the cost of the work accomplished by this mode of illumination.

The wall having been finished, up to the coping, between new Piers Nos. 44 and 45, there remained, in front of and about 30 feet from it, the old block forming the north L of old Pier No. 51. The top of this block had been removed and put inside the wall by hand-barrows, and Dredge No. 3 was brought in to complete the work, when one of the Commissioners (Mr. Budd), thinking that the operation of placing the stone dredged from the block on the deck of a scow, to be afterwards thrown off by hand too slow, ordered the Superintendent of Floating Property to bring the dredge alongside the wall, so as to throw the material over and let it fall on the inside. In obedience to orders this was done, and thus, at each stroke of the dipper, a mass of mud and stone, weighing from 3 to 4 tons, was taken from the front of the wall, carried over, and let fall on the in-

ide, through a distance of 12 to 15 feet. This immense batter-ng-ram had made about fifty blows, when the wall yielded and as broken, about the middle of the stretch, between new Piers Nos. 44 and 45. The strength of the wall was shown by the act that it was not curved, but preserved a straight line from the point of rupture to each end. At the break it was moved out of line 69 inches. When the damage was done, the beam of mass concrete, 240 feet long, broken, the foundation piles had lost much of their power of resisting lateral pressure, by being inclined, and complete restoration became impossible. To prevent any further displacement, several hundred cubic yards of rip-rap were thrown in front of the wall, forming an embankment, within 8 feet of low water, 20 feet wide at the top, the inner edge of the embankment being 10 feet outside of the bulkhead line.

The power of resistance in the wall itself being gone, and the rip-rap not acting immediately, a further movement took place until the deflection reached 3 inches, when I ordered the building of a crib inside to be attached to the wall with rods and chains, and to be filled with stones and sunk. As rip-rap had been put down inside the wall over a width of 25 feet, and to a depth of 6 or 8 feet, in accordance with the original plan, and as through this rip-rap retaining piles had been driven, 4 feet between centres, it was expected that this crib would settle away towards the street, an expectation fully borne out by the subsequent experiment.

Seven holes were drilled, at low water, at intervals for a length of 44 feet 5 inches, in the concrete backing of the wall. In each hole, two staples of 2-inch round iron, 2 feet long, with arms 6 inches long, at right angles, were inserted and cemented. To these staples were secured the eyes of 2-inch bolts, which ran back to 1⅞-inch and 1¼-inch chains, which, in turn, were secured to the timbers of the crib when the weighting of the latter commenced. The crib, 28x40 feet, was placed 58

feet away from the wall, where the original soft mud of the slip remained. When the crib was partly filled, the strain was so great as to open some of the hooks in the 2-inch rods. Some condemned 1⅛-inch steel wire rope being at hand, the broken rods were replaced by four parts of this rope, used in the manner of a Spanish windlass, and when the attachments were again complete, the weighting of the crib went on, until 297 cubic yards of stone had been placed in it. This strain on the back of the wall operated to such an extent that the deflection was reduced to 2¼ inches. At this time the filling had reached low water. To relieve the wall as much as possible from the pressure of the filling yet to be put in, a quantity of brushwood, reaching from the wall through the retaining piles over a space 30 by 75 feet, was spread to a depth of several feet, and this tended to prevent the lateral movement of the filling above.

It has been my endeavor to introduce into the construction of all piers built by the Department, better design, materials, and workmanship than have hitherto prevailed in such structures in our harbor, although this idea was not carried out to such an extent as I desired. At the Christopher street section it was done by building a portion of each pier on columns, 20 by 20 inches square, made up of four pieces of 10 by 10 inch timber, securely bolted and trenailed together; by close planking the bays on the outer ends; by the use of 1½-inch and 2-inch diagonal brace-rods, and by armature plates of ¼-inch iron from low water to the side cap, fitted to the columns, to protect them from the cutting action of ice. These piers have also been greatly strengthened and much improved in appearance by the use of 8 by 12 inch oak fenders.

An attempt at the preservation of the timber was made by painting it with "dead oil," and I believe a wise economy would be shown in creosoting all the timber in piers above the water line, a process which would certainly increase their life twenty or thirty years.

The work done at the King street section during the year ending April 30, 1875, was as follows:

The dredging for the river wall, between old Piers Nos. 45 and 46, was begun November 16, 1874, and amounted to 3,600 cubic yards. The foundation is to be 17½ by 147 feet, and 678 piles were driven. The caisson, 147 feet long, is constructed in the same manner with that at Canal street, and 626 cubic yards of 4-inch stone have been thrown in, and 1,225 cubic yards of rip-rap stone have been placed in front and rear of the caisson.

CANAL STREET SECTION.

This section was commenced on the 4th of May, 1874, by driving piles for new Pier 34, the present Pacific Mail Steamship Pier. It springs from the bulkhead wall almost in a direct westerly line from the small pier formerly known as 42½, a portion of which is now utilized as a shore connection for the occupants of new Pier 34, and what remains of old Pier 42. The dimensions of this pier are 583 in length by 90 feet in breadth, giving an available area of 52,470 square feet, or nearly an acre and a quarter of space.

Work was prosecuted with vigor, and by the 1st of September, 1874, the Pacific Mail Steamship Company were in occupation and paying a large rental to the Department.

The detailed statement of cost of this construction, as of the others on this section, are fully given in the report on this section, for the year ending April 30th last, herewith appended.

To accommodate commerce, two connections were made to old Pier 42, viz., for Pacific Mail Company and for the "Fort Lee Ferry Company," the latter being cut off from all access to west side by reason of a portion of old Pier 42½ having been cut through to permit of the building of the stone bulkhead wall.

The north half of old Pier 42 was, for a distance of 306 feet, torn away, and the stone blocking removed, and made of use, by being transported to the Christopher street section, and deposited behind the bulkhead wall at that point. By this change in old Pier 42, the slip to the south of new Pier 34 is materially widened, giving accommodation to the several occupants of the slips to the rear of the bulkhead wall, who were, of necessity, cut off from the street during the progress of construction of the wall.

Various small repairs and alterations have been effected on new Pier 34, some rendered necessary by accident, and some at the solicitation of the company occupying the pier; a detailed statement of all of these will also be found in the report. The bulkhead wall on this section, 110 feet of which has been finished, foundation up to stone facing for a distance of 80 feet built, and pile work for 60 feet more ready for concreting, is a point on which I will have to dwell at some length, as the method of constructing it differs materially from that used at the Battery and Christopher street sections. At the latter works, the system adopted was to drive piles, cut them off at a fixed distance from mean low water, and upon them place prepared beton blocks, by means of 100 ton derrick and divers.

On this section, as well as the King street section, the piles are punched down, and loose concrete laid "en masse" in a false work of timber, which is subsequently removed. I will more particularly describe the operations hereafter.

In Great Britian, and in the Continental countries of Europe, where the dicta of science are as unhesitatingly received as the truths of Scripture, it would be considered ludicrous for an engineer to give his reasons "in extenso" for the adoption of any particular system of construction; but in this liberal country where the people are sovereign, and every newspaper reader transformed into a remorseless critic, it is unsafe to originat

my plan without giving unanswerable reasons therefor, particularly when the plan must necessarily extend over a period of many years, and involves in its completion an outlay of from $25,000,000 to $50,000,000. This must be my excuse for the collection of the following excerpts, which are familiar to every well read engineer:

That eminent authority, Mr. Thomas Stevenson, in his work on the "Design and Construction of Harbors," at page 201, says: 'Sir John Hawkshaw has passed concrete through fifty feet of water with perfect success. As far as his experience went, the concrete set quite as well under these circumstances as when it was deposited in the open air. He has done this both in salt and fresh water. In passing concrete through water, he used a box containing almost two cubic yards; when it reached bottom, a bolt was withdrawn and the concrete dropped out."

The same authority, on page 202 of the same work, also says: "Mr. W. Parks put in the foundation of the iron light-house in the Red Sea by means of a caisson, into which the filled concrete in bags was deposited." Heathers describes the method of construction: "During this time some progress was made," at the light-house works. "The caisson of iron plates, to inclose the concrete base, had been deposited upon the reef, where it was exposed to a wash sufficient to remove some of its clayey particles without carrying it out of reach. As soon as a sufficient quantity of gravel was accumulated, the process of depositing the concrete was commenced. As circumstances did not admit of the usual plan of depositing the concrete in the water in large masses from boxes, the following plan was substituted: Sheets of tarred canvas were prepared of such sizes as would fill up the space between the piles and allow two feet round each side, to be turned up, so as to form large shallow bags. The edges of the tarpaulin were then lashed to wooden rods, which were slung to the piles, so as to allow the tarpaulin bag to float sluckly on the surface of the water. Two or three hours below

low water the work was commenced. The concrete was mixed in the lighters moored alongside the caisson, six measures of gravel being used with one measure of cement, and a suitable quantity of water. The materials were thrown into the centre of the canvas bag, which gradually sunk to the bottom (generally from one to two feet under water), and the bag was spread out evenly over the whole area as it became filled. This was continued until the tide rose nearly to the level of the top of the deposited concrete, when the sides of the tarpaulin were drawn close over the soft mass, and lashed tight. In this way, blocks of from 6 to 14 tons, were deposited without the material having been subjected in small quantities to the action of the water. The blocks were generally hard enough on the following day to allow of the exposed parts of the tarpaulin being cut away, and so complete was the set, that casts of the cords and edges of the tarpaulin were often sharply impressed upon the face of the concrete."

At the Canal street section the joints of the caisson were so close as to admit of scarcely any wash; and being in a slip with block and bridge piers on either side, the current was scarcely perceptible, consequently when the concrete was deposited little more "laitance" or milkiness was visible than would have been occasioned if fresh-made beton blocks, prepared on land, had been immersed in water. That eminent marine engineer, Sir Charles Hartley, in his valuable report on the "Delta of the Danube," at page 39, says: * * * "And the absence of divers to execute the work induced the author at first to adopt the plan of building the wall on a roughly levelled foundation by carefully lowering down masses of unset concrete within movable timber dams fitted in lengths of from 15 feet to 30 feet to the frame work of the piers. This plan was not adopted on a large scale, until it had been found by repeated experiments that the concrete, when made with a sufficient quantity of Portland cement, set perfectly hard on a rocky foundation in a seaway, although lowered through the water in a semi-liquid state."

In passing the cement through the water at Canal street, two separate one-yard tubs were used, and the concrete mixed was comparatively dry and far from a semi-liquid state.

At page 41, Sir Charles further says: "The spaces between the beton blocks used were filled up with newly-made concrete, which, searching its way under the adjacent blocks and filling in the grooves, molded in their sides expressly to this end, caused the whole mass to become ultimately as solid as if it consisted of but a single stone."

As to the strength of the Portland cement used, Sir John Coode, in his remarks from Hartley's description of the "Delta of the Danube," at page 74, says: * * * "The cement was tested by Grant's machine to resist a tensile strain of 350 pounds per square inch, after being immersed in water seven days. He had made large quantities of cement in mass under water and at a considerable depth, with the proportions of one of cement to five of gravel; he had executed a large amount of such work for some years past, and had built a substantial sea wall to the height of 40 feet upon it."

The proportions used at Canal and King streets are almost identical—one of cement, two of sand, and five of broken stone.

On page 76, same work, Mr. Coode says: "He had lately put down some foundations for a heavy sea-work on a rocky surface, where, if he had not deposited the concrete in mass upon the rock, the expense of preparing the bottom to receive the blocks would have been somewhere about twice or three times as great, and the time occupied would have been three or four times as long, as was required to execute the works by means of concrete deposited 'in situ' upon the bottom in 16 feet of water at the lowest spring tides." I further give some excerpts taken from the reports of the "Institute of Civil Engineers, London," vol. 1862–1863, a paper of Daniel Miller, entitled "Structures in the Sea without Coffer Dams."

"The system of building under water, by means of diving bells and diving dresses, has been practised to a considerable extent; and the improved apparatus now used gives great facilities for this kind of work. It is only applicable under particular circumstances, and it is also costly, besides being liable to cause delay in the progress of the work."

"There are three modes in which concrete may be applied for constructive purposes: Building it in mass, and allowing it to set before water has access to the work, as has been adopted in the construction of the walls of the Victoria Docks by Mr. Bidder, and in those of the London Docks by the late Mr. Rendel; preparing it first in blocks, and allowing it to harden before being used, as employed by the late Mr. Walker, at the Dover Breakwater, and by Mr. Hawkshaw for the new sea forts for protecting the arsenals of Plymouth and Portsmouth; and depositing it in a liquid state, and allowing it to set under water, as practised upon a gigantic scale by Mr. Nöil in the construction of the large Government Graving Docks, at Toulon. In the latter case, hydraulic concrete has been deposited in a liquid state in the sea water at a depth of about 40 feet, forming a vast rectangular trough of beton about 100 feet wide of the length of each dock respectively, and with walls and bottom about 16 feet thick."

Speaking of the various kinds of hydraulic limes, Mr. Miller says: "It may be useful to mention for comparison the proportions of some of the concretes made from these various limes. The Arden lime concrete, employed by Messrs. Bell & Miller for the foundations of the large Graving Docks at Glasgow, was composed of one part of ground Arden lime, one part of iron mine dust, and four and a half parts of gravel and quarry chips. The lias concrete, used at the recent extension of the London Docks by Mr. Rendel, consisted of one part of blue lias lime to six parts of gravel and sand. The proportions adopted for the blocks of the mole at Marseilles were two

parts of broken stones to one of mortar, the latter being composed of three parts Tiel lime to five of sand."

* * * "The Portland cement used at the New Westminster Bridge is harder and more compact than the greater number of building stones, even where put down in the bed of the Thames, and where it is exposed to the running stream."

* * * "The author had lately an opportunity of examining at Genoa the extension of one of the moles of the harbor, the inner side of which has a vertical wall.

"The latter was in process of being constructed under water entirely of pozzuolana concrete, simply thrown into the sea from buckets carried on men's heads, a boarding confining it to the shape of the wall. In a short period it set quite hard, so as to enable the upper part of the wall, which is of stone, to be built on it."

* * * "Though the depth of the quay wall was not great, this shows the confidence which the Italian engineers have in concrete applied under water in a soft state. The piers of the new basin constructed by the Austrian Government at Pola, in Istria, are also formed in a similar manner—of concrete confined between rows of timber piling. But perhaps the most striking application on a large scale of pozzuolana concrete is in the great mole which protects the port of Algiers. To form the mole, blocks of beton of immense size, so as to be immovable by the force of the sea, were employed, some of these formed 'in situ' by pouring the concrete into large timber cases without bottoms, sunk in the sea in the line of the mole."

"Hydraulic concrete, to be effective, requires great care and attention in its manipulation, and in the regulation of the proper proportions of its materials. Any failures must have arisen from inattention to these or similar points, as there is ample ex-

perience to show that, when properly made, every confidence may be placed in the strength and durability."

In the construction of the Albert Harbor, Greenock, the following occurs, same authority:

"The mode in which the work was designed, was to form the walls under low water of a combination of cast-iron guide piles in front, with a continuous stone facing, slid down over and inclosing these, and of concrete backing deposited in a soft state, all of which could be easily accomplished from above the water line." * * *

"This plan was felt to be so novel, particularly as regards the concrete, that, though the Trustees as a body had the greatest confidence in the engineers (Messrs. Bell & Smith), they considered it to be their duty before proceeding with the work to fortify themselves by having the opinion of another engineer. Accordingly, Mr. Thomas Page (M. Inst. C. E.) was consulted, who fully satisfied them as to the efficiency of hydraulic concrete applied in the manner proposed, and otherwise confirmed the soundness of the principles upon which the work was designed."

Again, same authority: "Immediately after being mixed, and when brought to a proper consistency with water, it is conveyed to where it is to be used, is let down under water in the discharge boxes, and in a short time sets very hard. * * * This mode of constructing walls in deep water, without cofferdams, has proved very successful, and a sea pier of great solidity and durability has been formed at a comparatively moderate cost." * * *

"Temporary sheet piling or boarding, instead of loose stone, may be employed to keep the concrete in its place until it has set."

General H. G. Wright, of the U. S. Engineers Corps, an officer of great experience, in a letter addressed to Major-General

Hamilton, late Superintendent in Charge of Yards, on the subject of Rosendale cement, among other things, says: "Of this cement I used some 50,000 barrels in the fort at the Tortugas; a large part of which was for foundations and walls under water. The particular blocks to which I referred were laid to test the workings of tremie. * * * They were laid in 1848, I think, and I left in 1856; they were in as good condition as when laid, surfaces being apparently as perfect. The concrete was made with sea water; no fresh water having been used."

In a subsequent statement, more particularly on the working of tremie system, made lately, that eminent officer said: "The success attending (the above) induced him to construct the foundation of several of the forts in Southern waters in a similar manner and with like success."

Forts Jefferson and Carroll he cites as prominent examples: * * * "Should not hesitate to construct foundations under water by depositing liquid concrete 'in mass,' if care was taken in its manipulation."

Besides the valuable experience of General Wright, as above detailed, to my own knowledge, mass concrete has been used in this country in the construction of foundations below water for a period of 25 years, at least.

While Engineer of the Brooklyn Navy Yard, I constructed a wall "en masse," which is a standing witness to-day of the success of the system. My predecessor in office there used somewhat similar means. Mr. McIlroy's wall at the Wallabout would have proved a success if attention had been given to the placing of more piles in the foundation, and had the Rosendale cement used retained its previously high character and not deteriorated in its tensile strength.

I will now briefly describe the method of placing this mass concrete "in situ" on the works in question.

The wall, up to within 2 feet $2\frac{7}{16}$ inches of mean low water, is made of a huge monolith of concrete "en masse," manufactured on this spot, and deposited "in situ."

The site for the wall was first thoroughly dredged to a mean depth of 20 feet below mean low water; piles were then driven, eight in a cross section of 17 feet 6 inches, and of an average distance of 2 feet 6 inches from centres, except the two front rows, which are centered 2 feet longitudinally; the outer and inner rows were driven as close as could be done without interference; they were punched down to about a mean distance of 13 feet below mean low water, by means of a heavy oak follower, 26 feet in length and 12 inches in section, armed at the bottom with an iron pintle and banded with iron to strengthen against fracture. This punching obviated the cutting off of any other than the westerly row, and these only for a distance of 180 feet. This uneven punching afforded a good grasp to the concrete around their heads. Intermediate broken stone of an average 4-inch cube was then filled in between the piles and allowed to take a bearing. The false work for receiving the concrete was then erected; yellow pine square piles, 12 inches by 12 inches in section, and of an average length of 40 feet, were driven in front of the westerly row of punched piles at a batter of $1\frac{3}{4}$ inches to the foot, and on the back at a batter of $\frac{1}{2}$ inch to the foot, centered longitudinally 8 feet to the inside of these square piles previous to their being driven; battens of 4 inches by $2\frac{1}{2}$ inches spruce were nailed on firmly, and on these further pieces of spruce, 12 inches by 2 inches, were fastened, forming grooves for receiving constructed wooden shutters or gates, which were slid into place after the pile alignment was perfected. These piles were then capped crosswise by square 12-inch timber, braced latterly by walling pieces, 12 inches by 6 inches, and on these cross caps, stringers were laid, on which were placed rails of flat iron to receive the wheels of a movable platform car, bearing on it a 10-horse power engine, for the lowering of the

concrete into the caisson. This platform car had erected on it a gallows frame holding traverse wheels with pendant bales of iron, from which were suspended double-block purchases for the lowering and hoisting of two separate one-yard buckets, each working from a separate drum independent of the other, so that one bucket could be lowered while the other was filled.

The concrete was mixed on a platform in the rear, constructed on the stay piles driven in the rear of the wall, wheeled to the car, dumped into the buckets or tubs, and then lowered into the caisson.

The door of the bucket being opened from above by a trap-rope did away with the necessity of employing divers, and the only occasion when divers were used at all was when Mr. McDonald, foreman of masons, himself a practical diver, levelled off the top layer of concrete to receive the granite facing. The buckets could be shifted from above in such a manner as to command any portion of the bottom.

The proportions of the concrete varied occasionally, but the usual proportions were as before stated, 12 and 5, or one part cement (Portland), two of sharp sand, and five of small broken stone.

Concreting was commenced on the 24th of December last, and continued until the 6th of January, 1875, a layer of two feet being spread over the bottom and binding the pile-heads firmly together; the quantity of ice by this time proving very troublesome, concreting was suspended until the middle of March (though further piling for the wall was continued throughout the winter with scarcely any intermission), and vigorously prosecuted until the end of April, when the whole mass necessary was placed.

In the hearting of the caisson one-fifth of the granite spawls from the Departmental Stone-yard were placed and thoroughly

grouted, preserving the stability of the wall and lessening the expense.

In placing the concrete in water chilled sometimes to three degrees colder than the freezing of fresh water, some means had to be adopted to counteract the coldness of the water. That eminent and versatile engineer Mr. Chanute, in his report on the Kansas City Bridge, says: "Both masonry and beton were laid in extremely cold weather, the use of hot sand and water being found to make this perfectly practicable. The sand was heated in large sheet-iron braziers, and the water warmed in cast-iron kettles, one of each being found sufficient to supply the force working on a pier. The heat which was thus artificially given to the mortar hastened its setting, causing this to take place before the mass had cooled enough to make freezing possible."

Mr. T. C. Clarke, in his able and exhaustive report on the Quincy Bridge, says: "During this time the glass fell as low as 16 degrees Fahr. A shanty was built on a flat and in this a kettle was placed on a stove, and the cement mixed with hot water. During the coldest days each stone was, before being set, held over a brazier of charcoal to draw out the frost. The mortar was carefully examined in the spring and found to be hard and perfect as any on the work. Much of the masonry of this bridge was constructed during winter, although none in as cold weather as this pier, and there is apparently no difference in the quality of the mortar, whether built in winter or summer."

As the cement used by these gentlemen was very small in comparison with what would have to be used in the bulkhead wall in question, some means had to be taken of a more extensive nature. For heating the water the following simple apparatus was used: A cask capable of containing 60 gallons of water, holding a coil-pipe, was placed on the movable car, and through this coil the steam from the boiler of the engine

was passed at will. This heating was done very rapidly and efficiently, it only taking from 4 to 8 minutes to heat the whole 60 gallons from 33 degress to 100 degrees Fahr., the water thus heated being carried to the mixing platform by india-rubber tubing. To heat the sand and broken stone, heaters made of iron, similar to those used in street paving, were constructed by Mr. Joseph Edwards, 414 Water street, New York, each capable of heating 1 cubic yard of material, the fuel used being old barrel staves, etc. They did their work thoroughly, and by this means work was carried on, on one occasion when the temperature of the air was 11 degrees Fahr. and that of the water 32 degrees, the concrete becoming as hard as if made during the hottest summer months, thus carrying out the opinions of Messrs. Chanute and Clarke.

In laying the backing to the granite facing I have introduced a change from that at Christopher street section which has materially lessened the expense while preserving the stability of the wall. Blocks of about 3 cubic yards' capacity were made at the Seventeenth Street Yard, out of old granite spawls and Portland cement; when sufficiently compact they were transported to final street and placed in position with great rapidity—over 76 lineal feet being laid during one tide. The success attending the use of these rubble blocks has been such that I have recommended to the Board in my report on the "Development of the Harlem River and Spuyten Duyvil Creek for Commercial Purposes," that the bulkhead wall when constructed should be composed of beton placed "en masse," with a rubble masonry facing surmounted by a granite cope.

On the removal of the shutters and square piles—the false work of the caisson—which had been down nearly three months, Mr. McDonald carefully examined the sides of the monolith, and stated that he found it as smooth and compact in appearance as any blocks he had ever seen, which were manufactured on

land, and no sign of honeycomb. This assertion was verified by my assistants, who passed a boat-hook all along the sides, both front and rear, and found it as smooth as the Gansevoort street manufactured blocks; the edge of the "berme," too, 6 inches in width where the stone facing springs from the monolith of concrete, was as distinctly defined as that of a well-cut piece of granite.

A great saving has been effected by this system of construction over that of the block system. Including coping not as yet required on this section (the wall constructed being in the wake of the pier), the saving amounts to $67.77 per foot run, or over $350,000 per mile, the cost per foot run being $311.67.

By having a long stretch of work, a judicious use of labor, and using made rubble blocks surmounted by granite cope instead of cut facing, I am of the opinion that the cost can be reduced 20 per cent. It is worthy of notice before leaving this section, that in the pile foundation now waiting stone packing driven to the north of the already completed wall, 207 old piles, drawn up from the north half of old Pier 42, and which had been down for a period of over 25 years, were driven in the wall, the only thing noticeable being that a few of the heads required recutting, otherwise they were as good as the day they first were driven.

GANSEVOORT STREET YARD.

The following alterations were made at Gansevoort Street Yard during the year:

The manufacture of beton blocks for the river wall being no longer carried on at this yard, the platforms upon which about 9,300 cubic yards had been made during the previous two years were removed.

The preparations for surrendering Yard No. 3 involved the removal of a large amount of varied stores and material. The grade of the yards and bulkhead was raised an average of three feet, to conform to the new level established, with ashes and like material delivered by the Street Cleaning Department.

A new blacksmith shop was built in the middle yard; the grade of the storehouse floor was changed and one-half of the large storehouse was partitioned off into small store rooms for the floating property, repairs and supplies, small stores and an office, leaving the other half, which is 164 feet long by 24 feet wide, for the storage of cement, with a capacity of 3,400 barrels. The fences and gates of all the yards were also raised.

Yards hitherto known as "Yards Nos. 1 and 3" have been turned over to the Commissioners of the Sinking Fund—Yard No. 2, with one pier, being retained for the uses of this Department. The dimensions of Yard No. 2 are 163 feet in length by 52 feet in width, in which has been built the new blacksmith shop, the remaining space being occupied by a shed for forge coal, a bin for hard coal, containing about 39 tons, and for the storage of wheel-barrows, lumber, beton molds, and miscellaneous material.

For a detailed statement of purchases, receipts and deliveries of every description, and of articles manufactured and stock on hand, reference is requested to the returns from Gansevoort Street Yard in the Appendix accompanying this Report.

EAST SEVENTEENTH STREET YARD.

During the year about 1,300 feet of narrow gauge railway has been constructed at this yard, at an average cost of one dollar per running foot. This, with four cars, made at the yard, two for cement and two for granite, greatly reduces the cost of

loading and unloading stone and cement. The railroad also renders every part of the yard available for storing stone, while formerly only the bulkhead could be used for that purpose.

The storehouse, besides the portion used for storing iron bolts and small articles, and the carpenters' shop, can conveniently receive about 5,000 barrels of cement.

The blacksmiths' shop contains four forges, three of which would be sufficient to sharpen tools for a force of 30 stone-cutters, and the remaining forge could be used for any general blacksmith work required by the Department along the East river front.

The cost of stone-cutting for the year, at $1.42 per cubic foot, is less than the same work could be done for by contract. This result has been attained by the system of keeping an account of the work done by each stone-cutter, and requiring all to come up to a certain standard. The yard itself possesses great advantages either for stone-cutting, or simply for storing it until required for use at the several sections. Besides the space occupied by buildings, it has an area of 2¼th acres available for storage purposes, with a bulkhead front of 645 lineal feet.

There were manufactured at this yard 36 rubble blocks, at a cost of $9.77 per cubic yard. The first 18 of these blocks cost $10.70 per cubic yard, and the last 18 cost but $8.84 per cubic yard, the lesser cost of the latter being due to the fact that the platforms upon which they were built were all finished for the first lot and consequently no carpenterwork enters into the estimate.

FLOATING PROPERTY.

The floating property of the Department of Docks is as follows:

Three tug-boats, in good condition, with the exception of the "Louis," undergoing repairs.

Four dredges, all in good condition.
Nine pile-drivers, all in good condition, except No. 6.
Eighteen mud-scows, all in good condition, except four.
One patrol boat, in good condition.
Eleven deck-scows, four of them new.
One boring machine for taking soundings.

For details of floating property and of dredging, etc., performed during the year, see Appendix.

GENERAL REPAIRS.

The general repairs to old piers and other structures, performed since February 1, 1875, at which time work of this class was placed under my supervision, were as follows:

The dumping-board at foot of Forty-sixth street, East river, was repaired on the 10th of February, and again on the 4th of March.

At Blackwell's Island three platforms were built for the use of the Police Department scows, and of the following dimensions: 51x31½ feet, 43x32 feet, and 41x26 feet, constructed between February 27 and March 10.

At Randall's Island an extension on a pier was built, 23 feet long by 74 feet wide, from March 9 to 19.

Repairs were made on Piers Nos. 40 and 41, East river, February 26 to March 26; Pier No. 6, East river, March 20 to 23; Pier No. 7, East river, March 22 to 26; Pier No. 8, East river, March 23 to 26; Pier No. 48, East river, March 25 to April 5. These repairs consisted mainly in work at the outer ends of the piers, which had been damaged by the ice, as in putting on fenders, corner bands, clusters, and spring piles.

The bulkhead between Gansevoort street and Little Twelfth street was raised two feet for a length of 733 feet, to conform to

the new grade of Thirteenth avenue, between March 20 and April 6.

The bulkhead at the foot of East Seventeenth street was repaired and strengthened for a length of 450 feet, by driving down forty-nine piles, April 2 to 10.

Pier No. 37, East river, was repaired with spring piles, chocks and fenders, April 6 to 14.

The pier at foot of Twenty-eighth street, East river, was repaired with new fenders and backing logs, April 14 to 19.

The pier at foot of Twenty-fourth street, North river, was extended 50 feet by 50 feet.

A platform 100 feet long, extending out 20 feet, was built against the bulkhead at the foot of One Hundred and Thirtieth street, North river, April 16 to 24.

Pier 46, East river, was repaired April 21 to 27; the pier at the foot of Forty-sixth street, North river, April 26 to 27; the pier at the foot of One Hundred and Fifty-fifth street, North river, April 26; the pier at the foot of Twenty-sixth street, North river, April 27 to 30; the bulkhead between Piers Nos. 45 and 46, East river, April 28 and May 1; and the pier at the foot of Forty-seventh street, North river, April 27 to May 1.

A cluster of piles was driven and secured to the end of Pier No. 38, East river, to keep vessels off the old block.

On the 30th of April the following works were in progress: Repairs at the foot of Twenty-fifth street, North river; at Fifty-first street, North river, and the tearing up of the pier at Ninety-sixth street, North river.

The damage to piers from floating ice has been unusually severe during the past winter. Ninety piles were cut from under the pier at the foot of One Hundred and Twenty-ninth street,

North river, leaving the deck unsupported for about 100 f
All but about 50 feet of the pier at the foot of Ninety-s
street, North river, was entirely carried away, and on the
river the ends of Piers Nos. 12 and 38 were entirely wrecke

For the general repairs performed prior to February 1, 1
under the supervision of the Superintendent of Repairs
Supplies, and for more minute details of work accomplishe
would refer to the Appendix accompanying this Report.

HARLEM RIVER.

The great difficulty which has thus far prevented the impr
ment of the Harlem river has been the clashing of autho
delegated by the Legislature to the different Commissions.

April 15, 1871, an act was passed giving the Departmen
Public Parks full powers "To build or construct, by cont
or otherwise, any and all improvements in the navigation of H
lem river and Spuyten Duyvil Creek, which said Departm
might plan or locate."

Three days after the passage of the above act another
passed which amended the "Act creating the Department
Docks," and provided that the plans of this Department, w
confirmed by the Commissioners of the Sinking Fund, sho
constitute the sole authority for the solid filling in the wa
surrounding the City of New York, and repealing all other p
visions of law regulating solid filling and pier and bulkh
lines in said waters.

Thus by the latest act the Department of Docks was gi
the authority, with the confirmation of the Sinking Fund C
missioners, to lawfully supersede any lines established by
the Commission or any other Commission.

The authority to determine upon a plan or plans for the i

provement of the whole or any part of the water front of the city was so clearly the prerogative of the Department of Docks, that the Park Commissioners, in a report to the Senate, April 1, 1872, made use of the following language: "A question having arisen as to the jurisdiction of the Board over the Harlem river, the work, so far as related to special hydrographic objects, was suspended, and only so much as relates to other objects has since been continued."

In March, 1872, the Commissioners of the Department of Docks submitted to the Commissioners of the Sinking Fund new pier and bulkhead lines for that part of the city north of Sixty-first street, including the Harlem river and Spuyten Duyvil Creek. These lines were neither accepted or rejected by the Sinking Fund Commissioners, although, as far as the Harlem river was concerned, it made but little difference, as the lines submitted by the Dock Commissioners were almost identical with the then existing lines which had been made by the Park Commissioners in 1868.

In this condition of affairs the new Charter was passed, April 30, 1873, which rescinded the authority previously delegated to the Department of Docks, and in the following language, it is claimed by the Department of Parks, confirmed their lines: "There shall be a Department of Docks, the head of which shall be a Board consisting of three persons * * * * who shall possess such powers and perform such duties as are now possessed by the existing Department of Docks, but said Board shall not have the power to change the exterior line of piers and bulkheads as now established by law."

The Charter, by taking away the power from the Department of Docks to establish pier and bulkhead lines, effectually suspends the improvement of the Harlem river, for no improvement of a permanent character, and based upon a knowledge of the tidal laws in this and the Hudson river, can take place until the

existing lines in this locality are changed, or, in other words, until the section of the improved river, instead of being contracted in Spuyten Duyvil Creek, is made as wide or wider than the Harlem river.

In brief, the whole improvement of the Harlem river and Spuyten Duyvil Creek consists in so adjusting the lines of solid filling, as that the best interchange of tides between the East and Hudson rivers may take place; and inasmuch as the existing lines were planned without any reference to the flow of the tides, to have them legally changed is the first step towards the improvement of these rivers.

In April, 1874, the Legislature passed a joint resolution calling upon the Department of Docks to make the necessary surveys and soundings from the mouth of the Bronx river to the southerly boundary of Yonkers, in the recently annexed Twenty-third and Twenty-fourth Wards. Instead of at once entering upon the survey, with a view of giving the city an accurate map of the water front in these wards, a want which is still severely felt by those holding property along the Harlem river, nothing was done in the matter.

The very full reports furnished by me in relation to this survey (and which accompanied the recent report of the Commissioners in answer to the concurrent resolution of inquiry by the last Legislature as to the reason of the work not having been prosecuted) contain the reasons in detail, why the numerous surveys that have been made in this region, from time to time, do not meet the present wants.

The assertion contained in these reports, that "no complete hydrographic map of the Harlem river, Spuyten Duyvil Creek, and the water front of the recently annexed Twenty-third and Twenty-fourth Wards exists at the present time," is still true, notwithstanding the recent survey made by General Newton. This, while an excellent one of its kind, and useful for certain

purposes, entirely fails to furnish the detailed information required to locate the water front of a rapidly growing city, nor could it be considered as anything more than a preliminary survey, in the event of any extensive river improvement being entered upon.

The survey called for by the resolution above mentioned is required, whether the Harlem river be improved or not; but should any measure be adopted for the re-adjustment of its bulkhead lines, the necessity for this survey will be more apparent than ever.

Should the Department of Docks be vested with the power by the Legislature to establish permanent lines for the solid filling on the Harlem river, these lines should be, as I have shown in a report made to this Board, May 20, 1875, either parallel lines through the Harlem river and Spuyten Duyvil Creek, or lines diverging from the Harlem river, so as to increase the section of the improved river at its mouth on the Hudson. Where continuous parallel bulkhead lines are sufficient to accommodate the requirements of commerce, the system of parallel piers being entirely inadmissible in consequence of the narrowness of the river, I advocate the construction of wet basins within the masonry bulkhead.

The bulkhead wall, when constructed, should be composed of beton, placed "in situ," with a rubble masonry facing, surmounted by a granite cope. In conclusion, I desire to express in the most emphatic manner, the wisdom of adhering to the natural channel of the river, as proposed by the Harbor Commissioners in 1857, the Department of Parks in 1868, and the Department of Docks in 1870.

Artificial channels for the purpose of making short cuts between portions of the same river, or between a river and bay are of doubtful utility at the best, and when such a canal would as in the present instance, intercept established lines of com

munication between the city and the recently annexed territory, and destroy the value of a vast amount of property which has already been partially improved with a prospective view to its occupation for commercial purposes, its construction should not be thought of.

NORTH RIVER.

In 1834, Commissioners were appointed by the State of New York and New Jersey to define the boundary line between the two States in the Hudson river and New York Bay, and their report was ratified and confirmed by their respective Legislatures and by Congress.

If some joint action of this kind had been taken by the two States in 1855, when New York appointed a Commission "For the Preservation of the Harbor," the vexed question of encroachments in the co-terminous waters of New York and New Jersey might have been settled forever.

That the New York Harbor Commissioners were fully sensible of the fact that their work would only be half done unless in some way it could receive the sanction and co-operation of New Jersey, we can see from their report, in which they say: "It was obvious that the preservation of the Harbor and a just regard to the interest of both States that proper limits should be defined on either shore, and that these limits ought to be simultaneously determined. If in the absence of restrictions piers were unduly projected into the river from one shore, they might have an injurious influence on the other, or if from both, there was reason to apprehend that the navigation of the river would be affected."

Entertaining these views, the New York Harbor Commissioners addressed a communication to Governor R. M. Price, of New Jersey, asking him whether, if they laid pier and bulkhead

lines for both States, they would be accepted by the State of New Jersey.

To this the Governor responded that any lines laid down for the New Jersey shore, while they would be received with great confidence for impartiality, could not be legally fixed or accepted without being confirmed by the respective Legislatures of New York and New Jersey, and by the Congress of the United States.

Here the matter rested; the New York Harbor Commissioners laid down pier and bulkhead lines for both shores in the Hudson river and New York Bay, but they were never accepted by New Jersey.

In 1865, a report was made by Commissioners appointed by the Legislature of New Jersey, which contained a survey of the lands lying under the waters of the Hudson river and New York Bay, with proposed pier and bulkhead lines for this locality. The lines laid down by the Commissioners are the governing lines I believe at the present date. Whether they were determined with any reference to maintaining the capacity of the Hudson river as a tidal reservoir, and thereby keeping the channels at Sandy Hook the same, or whether the more narrow policy of looking after local interests merely prevailed, I am unable to state; but I should think the subject important enough to warrant the appointment of a Joint Commission by both States, and, after their report shall have been made, to lay the matter before Congress for final confirmation, just as was done in the boundary question in 1834.

It seems not a little curious that such an important question in which both States are equally interested should have slumbered so long. And not only New York and New Jersey, but the Federal Government itself is interested in preserving the best harbor of the country, which yields by far the largest revenue.

The most intelligent and thorough representation of the whole subject was made by the Harbor Commissioners in 1856, to both State governments, and it is to be much regretted that in neither State have their lines been adhered to in the controlling sections of the Hudson river.

The gradual, but constant advancement of Sandy Hook towards the channels from the ocean, will, at some future date, seriously affect the commercial supremacy of the port. Within a century it has increased a mile and a quarter, and in the twelve years, from 1844 to 1856, it advanced a quarter of a mile.

Various causes have been assigned for this alarming progression, but while no one of them seems sufficient to produce the result, it probably arises from several.

Among the principal of these are the indiscriminate dumping of ashes and other solid material in all parts of the harbor, and the extension of the pier and bulkhead lines at points where the river should not be contracted, and which has resulted in the partial exclusion of the tidal waters.

EAST RIVER.

I would respectfully suggest, in connection with the proposed improvements on the East river water-front, that this work should not be entered upon by the Department until the modification and changes in the existing lines, as recommended in my letters to the Board, of February 12 and March 16, 1875, shall be authorized by the Legislature.

These changes contemplate, first, a reduction in the width of the river-front from the Battery to Corlear's Hook, and in the length of the piers in the same locality; and, secondly, to omit altogether the precise location of the new piers, establishing merely the pier and bulkhead lines. Determining the location

and dimensions of new piers in advance of the demand for them, is productive of serious embarrassment to the Department, and I am firmly convinced that all that is required in reference to these piers, at this time, is the establishment by the city of a pier line or limit of encroachment, beyond which no structure should be permitted. It would, by no means, however, be made obligatory on the Department to carry all their piers out to this line; on the contrary, specific dimensions should be left to the discretion of the Board of Commissioners, and should be decided from time to time by the demands of commerce in each locality, as well as by the ascertained configuration of the shore and river bed.

The width of the channel in the East river upon which the calculations of General McClellan were based for the lines proposed in 1870, has been materially reduced since then by the extensive and unrestrained construction of solid bulkheads and projecting works on the Brooklyn side. This shows the necessity of the Legislature fixing the limits on both shores simultaneously, and with reference to the preservation of the harbor. Fortunately in this case, both sides of the river are within the jurisdiction of the same State, and we do not have the complication which exists in the settlement of similar questions affecting the Hudson river side of the city, of a treaty with New Jersey and the necessity of its ratification by the Congress of the United States.

In my judgment, derived from experience in the construction of the several works described in this Report, the contract system cannot be economically or successfully applied in carrying out the plans of this Department. It will at all times be necessary so to manage operations on any given section of the river wall, and the slips and piers belonging thereto, as to cause the least possible hindrance to commerce, and this will involve, as at the Christopher street and Canal street sections, the construction, maintenance, modification, and removal of a system of temporary

connections and the like, which, from the very nature of the case, cannot be foreseen and calculated with sufficient accuracy to admit of proper description in specifications for a contract. On the other hand, should a contract for any such work be made, without provision for such inevitable interruptions and outlays, the city would be involved in interminable disputes, as well as made liable to vexatious claims for damages and demurrage. In view of this necessity of dispensing with the contract system on all new work, I have steadily endeavored so to simplify the method of construction as to admit of the employment of the largest possible proportion of unskilled labor, and it had been my intention to further extend the application of this idea upon the works yet to be undertaken.

A striking commentary upon the undesirable nature of the contract system, in connection with structures upon whose constant use the commerce of the city is necessarily dependent, is to be found in our history of general repairs during the past season. Pier No. 38, East river, and the pier at the foot of One Hundred and Twenty-ninth street, North river, were carried away by the ice on the 18th of March, and the proposals for contracts for rebuilding them have not yet been opened. If we suppose these piers, instead of being in localities where the demand for their use was comparatively unimportant, had been in the lower part of the city, say near the foot of Warren street, it will at once appear that the system which would have deprived commerce of their use for so long a time must be radically defective. In any extended destruction of wharf property by fire or flood the contract system would be found an incomparably greater calamity than either the flood or the fire. Neither is it true that the city cannot find honest and capable servants who will so manage the duties entrusted to them as to ensure economy as well as all other desirable results.

In time of war it is customary to commend the gallant acts and daring exploits of individuals in the official reports; why this

WILLIAM BUDD, *Treasurer, Department of Docks, in account with* THE MAYOR, ALDERMEN, AND COMMONALTY OF THE CITY OF NEW YORK, *for and during the year ending April* 30, 1875:

	DEBIT.			
May 1, 1874	To balance, viz.: Amount of rents due and unpaid April 30, 1874, as charged upon existing leases on wharf property belonging to the City of New York, consisting principally of claims in the hands of the Counsel to the Corporation for suit, prior to May 20, 1876, at which time the Comptroller transferred to this Department for collection arrearages amounting to the sum of $112,077	$41,147 50		
	Cash in bank to the credit of the Department of Docks	17,669 24		
			$58,816 74	
April 30, 1875	To amount of rent accrued and charged from May 1, 1874, to April 30, 1875, to the respective parties by whom the same was payable	.....	589,361 06	
30, "	To amount of requisitions of the Commissioners of Docks upon Andrew H. Green, Comptroller, drawn in sums to cover original bills or vouchers forwarded to the Comptroller for payment (as required by the Department of Finance) after being certified to by the Commissioners of Docks and officers in charge of the several works	.....	1,536,204 33	
30, "	To amount received as follows:			
	Interest on deposits	$1,097 03		
	Repairs for private owners	28,308 37		
	Sales of old material	2,651 66		
	Sales of map showing water grants	37 50		
	Expense account	1,205 07		
	Privilege of dumping dirt	1,130 50		
			34,430 13	
				$2,218,812 26

difficult reports relating to important subjects connected with my duties, I desire to express my most earnest appreciation.

To Edward McDonald, Master Mason, whom I found a mere diver, and advanced to the most important mechanical post connected with the masonry bulkhead, I desire to express my appreciation of his practical knowledge, steady industry, and able management of the force under his control.

Mr. Thomas Murphy, Superintendent in charge of construction at New Pier No. 1, North river, is entitled to a hearty recognition of the manner in which he has performed the duties originally entrusted to him by General McClellan.

To Messrs. Staats, Surveyor, Aitken, Recorder, Rathbone, Chainman, and to the several foremen and timekeepers of the various works, I likewise feel myself to be under many obligations.

To Mr. W. O. Stoddard, Chief Clerk of my office,who has supervised the labors of my desk and assisted me by night and by day, in conducting a large correspondence and in the preparation of my reports, I feel that much praise is due.

Very respectfully,

Your obedient servant,

CHARLES K. GRAHAM,

Engineer-in-Chief.

REPORT

OF THE

DEPARTMENT OF PUBLIC WORKS,

FOR THE

QUARTER ENDING JUNE 30, 1875.

IN BOARD OF ALDERMEN,

August 26, 1875.

DOCUMENT No. 14.

NEW YORK:
MARTIN B. BROWN, PRINTER AND STATIONER,
Nos. 201, 203, & 205 William Street.

1875.

DOCUMENT No. 14.

BOARD OF ALDERMEN,

AUGUST 26, 1875.

The following message was received from his Honor the Mayor, transmitting the report of the Department of Public Works for the quarter ending June 30, 1875; which was laid on the table, and ordered to be printed in document form.

FRANCIS J. TWOMEY,
Clerk.

EXECUTIVE DEPARTMENT, CITY HALL,
NEW YORK, August 19, 1875.

To the Honorable the Common Council:

GENTLEMEN—I herewith transmit for your information a communication from the Commissioner of Public Works, being a report of the transactions of that Department for the quarter ending June 30, 1875.

WM. H. WICKHAM,
Mayor.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19, CITY HALL,
NEW YORK, August 17, 1875.

To Hon. WILLIAM H. WICKHAM,
Mayor of the City of New York:

SIR—In compliance with section 27 of the Charter, I have the honor to submit herewith a report of the transactions of this Department, for the quarter ending June 30, 1875.

Statements "A" and "B" exhibit the amounts appropriated for the use of the Department; the expenditures incurred under the several appropriations; and the balances remaining unexpended.

The reports of the various Bureaus in the Department give a detailed account of their respective operations and expenditures.

The following is a brief review of the progress and condition of the works under the control of the Department:

CROTON WATER SUPPLY.

The construction of a highway at the Storage Reservoir, at Boyd's Corners, is nearly completed.

Work on the new Storage Reservoir, in the town of South East, Putnam County, is being vigorously prosecuted by the contractors.

It is expected that the Commission appointed by the Supreme Court, to appraise the additional lands required for the Reservoir, will soon make their report.

The rain fall in the Croton Basin has been less than for the past ten years, during the same period of the year, reducing the natural flow of the Croton river far below the quantity required for daily consumption; 425,000,000 gallons of water were drawn from the Storage Reservoir and the lakes to supply the deficiency.

The daily consumption is 107,000,000 gallons, or 5,000,000 gallons in excess of the consumption of last year.

The alterations of the Aqueduct, on Tenth avenue, are rapidly approaching completion.

In consequence of the funds for laying Croton pipes, issued under former laws, being nearly exhausted, and the failure of the Common Council to take the necessary action to make the appropriation under the law of 1875 available, very little work has been done in laying Croton pipes. The aggregate length of pipes laid is 1,755 feet; and by the placing of stop-cocks, the high-service water was made available for the highest portions of the Murray Hill district.

Ten of the six-feet pipes, which were originally laid by contract, have been, and others have to be, repaired.

STREET PAVEMENTS.

During the quarter, 23,417½ square yards of new stone-block pavements have been laid, under ordinances of the Common Council.

In consequence of the severe and late winter season, the pavements throughout the city were in very bad condition at the beginning of spring.

Repairs were begun with a large force, about the middle of April, in the lower and commercial part of the city, and continued until the streets in that quarter were in better condition than for many years past.

The unexpended balances of the appropriations for repairs of stone, wooden, and concrete pavements, will be applied to the repairs of the worst places above Canal street, for which they are barely sufficient; they are certainly inadequate to cover general repairs throughout the city.

GRADING, CURBING, GUTTERING, AND FLAGGING STREETS AND AVENUES.

The following quantities of work have been done, under contracts for the improvement of streets and avenues:

14,394 Cubic yards earth excavated.
41,353 Cubic yards rock excavated.
123,403 Cubic yards filling furnished.
8,371 Lineal feet curb and gutter stones set.
83,461 Square feet flagging laid.

SEWERAGE.

Under the direction of the Bureau of Sewers,

16,353 Lineal feet of sewers,
4,085 Lineal feet of drains,
297 Lineal feet of culverts, and
17 Receiving-basins, have been constructed.

The total length of sewerage in the city now is 344.85 miles, with 4,139 receiving-basins.

CONSTRUCTION OF ROADS AND AVENUES.

Under the Eastern Boulevard Improvement Act, work has been prosecuted on the following streets and avenues:

Avenue A, between Fifty-seventh and Seventy-second streets.
Avenue A, between One Hundred and Sixteenth and One Hundred and Twenty-third streets.
First avenue, between One Hundred and Ninth and One Hundred and Sixteenth streets.
Tenth avenue, between One Hundred and Tenth and Manhattan streets.
Seventy-second street, between Third and Madison avenues.
One Hundred and Tenth street, between First avenue and Riverside Drive.
One Hundred and Sixteenth street, between Fourth and Sixth avenues.

Progress has also been made in the construction of sewers on the Boulevard and Avenue St. Nicholas, and in planting shade trees along the Boulevard, Avenue St. Nicholas, Sixth and Seventh avenues.

Under ordinances of the Common Council the following improvements have been prosecuted:

Grading and superstructure of One Hundred and Twenty-second street, from Tenth avenue to Riverside Drive.
Grading New avenue, from One Hundred and Tenth to Manhattan street.
Grading Ninth avenue, from One Hundred and Twenty-third to One Hundred and Twenty-sixth street.
Grading Twelfth avenue, from One Hundred and Twenty-ninth to One Hundred and Thirtieth street.
Grading Morningside avenue, West, from One Hundred and Tenth to One Hundred and Twenty-second street.
Superstructure of One Hundred and Forty-fifth street, from Seventh avenue to Boulevard.

The following are the aggregate quantities of work done in the prosecution of these improvements:

8,907 Cubic yards earth excavated.
10,959 Cubic yards rock excavated.
52,259 Cubic yards filling furnished.
10,361 Cubic yards broken stone furnished.
6,200 Cubic yards retaining wall built.
28,480 Square yards Telford roadway laid.
13,793 Square yards Telford-macadam roadway finished.
9,469 Square feet flagging laid.
3,763 Lineal feet curb set.
1,559 Lineal feet curb reset.
3,135 Lineal feet brick sewers constructed.
466 Lineal feet pipe sewers laid.
14 Manholes, and 11 receiving-basins constructed.

PUBLIC LAMPS.

The number of public lamps in use throughout the city on the 1st of April was 20,071. During the quarter, 104 new lamps were erected and 117 old lamps were relighted, 387 were discontinued, leaving 19,905 lamps in use at the close of the quarter; a decrease of 166.

The cost of lighting the lamps for the current year is as follows:

	Per Lamp.
New York and Manhattan Gas-light Company, for lamps south of Thirty-fourth street	$38 00
Harlem Gas-light Company, for lamps between Seventy-ninth street and Harlem river	39 00
Mutual Gas-light Company, part of lamps between Thirty-fourth and Seventy-ninth streets	26 00
Metropolitan Gas-light Company, for portion of lamps between Thirty-fourth and Seventy-ninth streets	38 00
Westchester County Gas-light Company, for lamps in the Twenty-third Ward	46 00
Suburban Gas-light Company, for lamps in the Twenty-fourth Ward	50 00

The gas for the lamps in the Twenty-third and Twenty-fourth Wards is furnished under contracts made prior to the annexation of these wards to the city.

PUBLIC BUILDINGS.

In addition to the ordinary repairs required for the maintenance of the large number of public buildings under the care of the Department, the work of constructing a new roof on Tompkins Market building has been prosecuted under contract. It became necessary to strengthen the building by the erection of piers, to support the new roof; and a contract therefor was made, amounting to $8,929. The building will be much improved, in strength and appearance, when the work now in progress shall be finished.

FREE FLOATING BATHS.

The two public baths were located at the foot of East Fifth street and foot of West Eleventh street, respectively, and were opened to the public on the 9th of June.

The average daily attendance to the 30th of June, was 7,200.

REMOVAL OF INCUMBRANCES.

The efforts of the Department for the removal of obstructions in streets and avenues, have been confined to the serving of notices on offending parties, in consequence of the refusal of the Finance Department to honor requisitions for funds authorized by law and appropriated by the Board of Estimate

l Apportionment, for the forcible and summary removal of structions. In most cases, the notices of the Department ceive no attention, in consequence of its inability to enforce e law.

REVENUE COLLECTED.

The following amounts of revenue were collected, and paid into the City Treasury, from—

Croton Water Rents	$314,788 84
Penalties on Water Rents	1,285 65
Permits to Tap Croton Pipes	2,778 00
Vault Permits	8,423 37
Sewer Permits	5,847 08
Sewer Pipe sold to Contractors	920 53
Work and materials furnished by the Bureau of Water Purveyor	270 00
Total	$334,313 47

CONTRACTS.

The following contracts have been entered into for—

Gas for Public Lamps and Buildings	6	contracts, amounting to	....	$350,890 50
Regulating, Grading, Flagging, etc.	25	"	....	57,930 95
Sewers	6	"	....	42,650 55
Paving	7	"	....	29,441 00
Piers at Tompkins Market	1	"	....	8,929 00
Lease of Offices	1	"	....	1,000 00
Total	46			$490,842 00

The certificates of the cost of completed improvements, transmitted to the Board of Assessors for assessment, amount to the sum of $478,152.68.

The reduction in prices for material and labor, as compared with last year, enables our appropriations to accomplish more work.

Very respectfully,

FITZ JOHN PORTER,

Commissioner.

DEPARTMENT OF PUBLIC WORKS,
CHIEF ENGINEER'S OFFICE, CITY HALL,
NEW YORK, June 19, 1875.

To FITZ JOHN PORTER, Esq.,
Commissioner of Public Works:

SIR—I have the honor to report that during the quarter ending the 30th of June, 1875, there has been expended in this Bureau, for work done and materials furnished, and for which bills have been transmitted, as follows:

Additional Alteration of Aqueduct, Ninety-third to One Hundred and Thirteenth street	$53,904 07
Aqueduct—Repairs and Maintenance	28,668 64
Croton Water Fund	26,588 41
Croton Water Main Fund	24,815 38
Repairing and Renewal of Pipes, Stop-cocks, etc	7,843 09
Contingencies—Department of Public Works	21 54
	$141,841 13

The rain fall in the Croton Basin has been less during the past three months than for the same months for ten years past, and the natural flow of the Croton river has been less than the consumption of Croton water in the city during the greater portion of the month of June, making it necessary to draw about 425,000,000 gallons of water from the storage reservoirs and lakes to supply the deficiency, commencing two weeks earlier in the season in drawing from the stored water than ever before.

The work on the new highway, under contract with Dooley & Curran, on the northeast side of the reservoirs, at Boyd's Corners, has been prosecuted with vigor, and will soon be completed. There is yet due, for right of way for this road, one hundred and twenty-five dollars.

The work of constructing the new storage reservoirs in the town of South East, Putnam County, under contract with Belden & Dennison, is progressing favorably and with a large force. The Commissioners for awarding land damages for lands to be overflowed by this reservoir have had several meetings, and it is expected will soon be able to make their awards.

The Aqueduct and reservoirs have been maintained in good order, and have furnished an uninterrupted supply of water. During the winter the water was drawn down in the reservoirs in Central Park, and, though bringing through the Aqueduct 107,000,000 gallons daily, we have not yet succeeded in filling it, the consumption being nearly equal to the daily supply from the Aqueduct.

The work of altering the Aqueduct between Ninety-third and One Hundred and Thirteenth streets has been prosecuted with a large force since the weather has been favorable.

The work of constructing Sedgwick avenue, under High Bridge, and through the Croton Aqueduct lands, with the necessary retaining walls, has been nearly completed.

The appropriation for laying Croton water mains being nearly exhausted there has been laid only

620	feet of	48-inch	pipe.
20	"	20	"
275	"	12	"
840	"	6	"
Total, 1,755	feet.		

The proper connections having been made, and stop-cocks placed, for the higher portions of Murray Hill, and the water from the High-service at High Bridge was turned on to this district in the latter part of May.

Ten of the six-foot pipes on Eighth avenue and Ninetieth street have been repaired.

Many of the people using Croton water having formed the habit of wasting water during the past cold winter, still continue wasting it, especially during warm days, and are now using five millions gallons per day more water than at the same time last year.

Very respectfully, yours,

JOHN C. CAMPBELL,
Assistant and Acting Chief Engineer.

CITY OF NEW YORK,
DEPARTMENT OF PUBLIC WORKS,
BUREAU OF WATER PURVEYOR,
July 1, 1875.

FITZ JOHN PORTER, Esq.,
Commissioner of Public Works:

SIR—I have the honor to submit the following report of the transactions of this Bureau for the months of April, May, and June, of this year:

REPAIRING CROTON PIPES, ETC.

Three companies have been employed in repairing and renewing pipes, stop-cocks, and fire-hydrants.

The various reports from the police, citizens, and others, of these necessary repairs have been attended to without any serious inconvenience to the public, unless may be excepted the repairs to a stop-cock on Houston street at Broadway, which necessitated the temporary shutting off of the 30-inch line on Broadway at that point.

When the repairs named were made, it was found impossible to raise the water gate, it having became rusted and corroded by age. A portion of the inhabitants of the lower part of the city

were thus cut off from their usual supply of water, but this was remedied in a few hours by the turning on in full force water in the new thirty-six-inch main on the east side of the city. This main was laid in the years 1871, 1872, 1873, and 1874.

There are a number of old water gates on the first lines of pipe laid in this city which need renewing or repairing, and a new main on the west side similiar to the one above named would much assist to avoid a diminution of the supply of water in any portion of the city, by the reoccurrence of such an event as happened at Broadway and Houston street.

LAYING CROTON WATER MAINS.

A small force of men have been employed in laying mains in the upper part of the city, but works of this character will in a few weeks be suspended unless additional funds are provided for their maintenance.

REPAIRING SIX-FEET PIPES.

A company of men have been employed in repairing six-feet pipes, which are the continuation of the aqueduct in Eighth avenue, between Eighty-eighth and Eighty-ninth streets, and in Ninetieth street, between Eighth and Ninth avenues, but for the same reason as mentioned in relation to laying Croton-mains will have to be suspended in a few days.

REPAIRS TO PAVEMENTS.

About the middle of April work was commenced repairing the pavements of the commercial quarter of the city, the business traffic being much impeded by the bad condition of the pavements rendered worse than is usual at the opening of the season for repairs by the continued severity of cold weather the past winter, the deep frost working out of the ground having much effect upon them, particularly cobble and wooden pavements. The

streets of the lower portion of the city have been put in better condition than they were ever known to be before. The force of men, though not sufficient for general repairs, will be reduced in a few days, owing to the insufficiency of the appropriations. The amount authorized by the Board of Apportionment, for repairs to stone pavements for this year, was $100,000, of which over $50,000 has already been expended in the space of two and one half months. The amount authorized for wooden and concrete pavement repairs was $50,000, of which over $30,000 has in same time been expended for labor and materials, besides accounts not yet presented amounting in the aggregate to $3,000 on stone pavement, and $3,000 on wooden, etc., pavements.

The balances of these appropriations it is intended to expend in repairing the very bad places in pavements above Canal street, general repairs being impossible with the means at hand.

Number of men employed under charge of Bureau of Water Purveyor during month of April, May, and June, paid from different appropriations, with amounts of pay-rolls.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF LAMPS AND GAS,
NEW YORK, July 7, 1875.

Gen. FITZ JOHN PORTER,

Commissioner of Public Works :

SIR—In compliance with your directions, I herein submit a report of the business of the Bureau of Lamps and Gas for the three months ending June 30, 1875.

In Exhibit marked "A" will be found an abstract of all vouchers drawn during the quarter. In Exhibit "B" is a statement showing the amounts paid for gas to the various public markets, offices, etc., and for fitting, repairing, and lighting the public lamps, etc. In Exhibit "C" is a summary of the appropriation for Lamps and Gas for 1874, showing an available balance of seven thousand two hundred and thirty-three dollars and ninety-eight cents ($7,233.98). Exhibit "D" is a summary of the appropriation for Lamps and Gas for 1875, showing an expenditure during the quarter ending June 30 of one hundred and sixty-five thousand eight hundred and three dollars and twenty-nine cents ($165,803.29), with liabilities amounting to forty-four thousand six hundred and forty-one dollars and seventy-eight cents ($44,641.78), leaving an available balance of three hundred and thirteen thousand two hundred and thirteen dollars ($313,213.00). Exhibit "E" is a summary of the appropriation for Lamps and Gas, Twenty-third and Twenty-fourth Wards, for 1865, showing an expenditure, on this account, of twenty-eight thousand eight hundred and thirty dollars and thirty-seven cents ($28,830.37), with liabilities amounting to nine thousand six hundred and eighteen dollars and forty-three cents ($9,618.43), leaving an available balance of forty-two thousand three hundred and two dollars and thirty cents ($42,302.30). In Exhibit "F" will be

d a summary of the Lamp Account, showing the number of lamps lighted, old lamps relighted, and lamps discontinued ach gas company during the quarter. By the recapitulation iis statement, it will be seen that one hundred and four new ›s have been lighted, one hundred and seventeen old lamps ;hted, and three hundred and eighty-seven lamps discontinued ng the quarter; the total number of lamps burning June 30 g nineteen thousand nine hundred and five (19,905), a ease of one hundred and sixty-six lamps since March 31.

Yours, respectfully,

THOS. O'CALLAGHAN,

Superintendent Lamps and Gas.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF REPAIRS AND SUPPLIES,
SUPERINTENDENT'S OFFICE, CITY HALL, ROOM 18,
NEW YORK, July 10, 1875.

FITZ JOHN PORTER, Esq.,

Commissioner of Public Works:

SIR—In accordance with the requirements of chapter 335, Laws 1873, section 110, and in compliance with your instructions, I herewith submit the following report of the business of this Bureau for the quarter ending June 30, 1875. The contracts made are as follows:

For building piers at Tompkins Market. Amount, $8,929. Contract dated June 2d, 1875. Franklin P. Nesbitt, Contractor.

The work on the other contracts for covering Tompkins Market Building is progressing.

The statements marked "A," "B," and "C," and hereto annexed, shows the number and amount of certified vouchers drawn during the quarter; also where the same has been charged; also shows the condition of the appropriations for the years 1874 and 1875.

Respectfully,

THOMAS KEECH,
Superintendent of Repairs and Supplies.

EXHIBIT "A,"

Showing the number of Certified Vouchers and Amounts drawn on Account of each Appropriation named therein, from April 1 to June 30, 1875, both inclusive, and transmitted for Payment.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF STREETS, July 16, 1875.

Hon. FITZ JOHN PORTER,

Commissioner of Public Works:

SIR—In compliance with your instructions, and with section 27 of the Charter, I have the honor to submit the following report of the transactions of this Bureau, for the three months ending June 30, 1875:

Repairs have been made on the following roads and avenues:

Eighth avenue, from One Hundred and Twenty-first street to Harlem river.
Tenth avenue, from Manhattan street to One Hundred and Fifty-fourth street.
Kingsbridge road, coated with gravel from One Hundred and Fifty-ninth street to Kingsbridge; Lawrence street, from One Hundred and Twenty-sixth street to the Boulevard; all cross streets, from One Hundred and Twenty-sixth to One Hundred and Thirty-third street, between Tenth avenue and the Boulevard; One Hundred and Twenty-sixth street, Third to Sixth avenue.
Madison avenue, from One Hundred and Twenty-fifth street to Harlem river.
One Hundred and Forty-first street, from Bloomingdale road to Boulevard.
Bloomingdale road, from One Hundred and Thirty-fifth to One Hundred and Forty-third street.
One Hundred and Fifty-first street, from Boulevard to Hudson river.
One Hundred and Fifty-second street, from Avenue St. Nicholas to Boulevard.
One Hundred and Fifty-eighth street, from Tenth avenue to Hudson river.

In addition to ordinary repairs, the culverts on Eighth avenue, One Hundred and Forty-first, One Hundred and Forty-third, One Hundred and Forty-fourth, One Hundred and Fifty-second, and One Hundred and Fifty-third streets, were put in complete order, broken stone was placed on Break Neck Hill road, and several large holes in other streets were filled in.

The following streets and roads were sprinkled daily when necessary:

Tenth avenue, from One Hundred and Forty-fifth to One Hundred and Fifty-fourth street.
Eighth avenue, from One Hundred and Twenty-second street to McComb's Dam Bridge.
One Hundred and Thirty-fifth street, from Avenue St. Nicholas to Seventh avenue.

The limited amount of the appropriation forbids the making of many repairs that would otherwise be made.

The following is an account of the appropriation and expenditures of this Bureau:

Amount Appropriated for Roads and Avenues, and Sprinkling, for 1875.		$20,000 00
Expenditures for quarter ending March 31		801 00
Balance unexpended April 1		$19,199 00
Expenditures for quarter ending June 30, 1875:		
Pay-roll for March—Laborers, etc.	$841 00	
Wm. McDonald, sand filling	800 00	
Pay-roll, April—Laborers, etc	1,051 25	
J. L. Mott Iron Works, tools, etc	136 97	
Pay-roll, May—Laborers, etc	1,466 25	
Patrick Daly, repairing tools, etc	71 90	
		4,367 37
Balance unexpended		$14,831 63

Traveling expenses of E. G. Gilmore, late Superintendent of Streets, paid from Contingencies--Department of Public Works..... $57 78

Respectfully submitted,

JAMES J. MOONEY,
Superintendent of Streets.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF INCUMBRANCES,
NEW YORK, July 1, 1875.

Hon. FITZ JOHN PORTER:

SIR—In compliance with your request, I respectfully make the following report of the operations of this Bureau during the months of April, May and June, 1875:

There have been received during the past three months at this office, 349 complaints of obstructions and incumbrances on streets and sidewalks; notices were made out and served on the parties complained of, who, in some cases, removed the obstructions. I would state in connection that in many instances the complaints are against nuisances of long standing, and great detriment to individuals, and the public generally, and have to be submitted to, from the fact that this Bureau is entirely without funds to remove nuisances. There have also been issued during said months 624 builder's permits to temporarily occupy the streets with building material. These permits are issued without charge to parties applying therefor, and are in many instances made nuisances to the neighborhood. The number of permits daily issued require more attention than this Bureau, with its limited means, can give.

There have been issued, and served on the owners, 54 notices to repair sidewalks, most of which have been complied with.

There have been 10 permits issued to cut down trees, also 24 special permits.

Respectfully submitted,

SETH C. DOUGLASS,
Superintendent Incumbrances.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF SEWERS, NEW YORK, July 7, 1875.

General FITZ JOHN PORTER,

Commissioner of Public Works:

SIR—In compliance with your instructions, I beg leave to submit a report of the transactions of this Bureau for the quarter ending June 30, 1875.

The amount of moneys received and deposited with the Chamberlain, was for permits for connections with sewers, and sewer-pipe sold to contractors, etc.

The number of permits granted for making connections with sewers was 411, and the amount received for same, and credited to the General Fund	$5,847 08
The amount received for the sale of sewer-pipe to contractors, and credited Street Improvement Fund	$920 53
The amount of sewer-pipe furnished for the construction of Boulevard sewers, and credited same	2,151 45
	$3,071 98
The amount of Engineer's and Surveyor's fees, assessed on property benefited, and charged on assessment-lists, to be credited to Street Improvement Fund	$3,924 00

The heads of accounts under which the expenditures are embraced are as follows: "Sewers—Repairing and Cleaning," "Sewer Repair Stock," and "Street Improvement Fund."

SEWERS—REPAIRING AND CLEANING.

The expenditures under this head are for the repairing and cleaning of sewers and their appurtenances, which are done by day's work, with the exception of the receiving-basins, which are cleaned by contract.

During the period referred to, 4,688 receiving-basins have been cleaned.

Unexpended balance April 1, 1875		$58,904 50

Vouchers transmitted to the Commissioner of Public Works:

Cleaning Basins—Foster & Holland	$7,200 00	
Cleaning Sewers—		
T. & J. D. Crimmins	3,463 85	
Michael Gavin	2,048 30	
M. H. Moore	943 13	
Pay-rolls—Mechanics and Laborers	3,505 00	
J. L. Mott Iron Works—For repairing manholes	124 53	
	$17,284 81	
Unexpended balance	41,619 69	
		58,904 50

SEWER REPAIR STOCK.

This Fund is applied to the payment of the rebuilding of the whole or any portion of any existing sewer, or in making material repairs to sewers, for which bonds are issued by the city.

Unexpended balance April 1, 1875	$689 13
Authorized by Board of Apportionment, May 21, 1875	20,000 00
	$20,689 13

Vouchers transmitted to the Commissioner of Public Works:

Repairing Sewers—		
T. & J. D. Crimmins	$2,002 59	
Mathew H. Moore	4,531 02	
Michael Gavin	4,854 53	
Manhole covers—J. Everard	815 47	
	$12,203 61	
Unexpended balance	8,485 52	
		20,689 13

STREET IMPROVEMENT FUND.

This fund is applied to the payment of all contracts for the construction of new sewers, drains, receiving-basins, and culverts: for the material used, and the expenses of engineers,

surveyors, inspectors, or other persons employed in the construction of same; the various expenditures under it forming no part of the expenses of the city, which is reimbursed by the collection of assessments imposed upon the property benefited by the improvement.

Vouchers were transmitted to the Commissioner of Public Works.....		$185,196 84
Pay-rolls of Engineers, etc.....	$13,003 46	
Pay-roll of Inspectors.....	4,308 00	
Contracts for sewers.....	141,995 11	
Contracts for drains.....	25,589 58	
Sundries.....	300 69	
		185,196 84

During the quarter referred to, 16,353 lineal feet of sewer, 4,025 lineal feet of drain, 297 lineal feet of culvert, and 17 receiving-basins were built, making the total length of sewerage in the city 1,820,838 lineal feet ($344\frac{85}{100}$ miles), and 4,139 receiving-basins.

All of which is respectfully submitted.

STEVENSON TOWLE,

Engineer in Charge of Sewers.

DEPARTMENT OF PUBLIC WORKS,
BUREAU OF CONSTRUCTION OF ROADS AND AVENUES,
ROOM 18½ CITY HALL,
NEW YORK, July 1, 1875.

Hon. FITZ JOHN PORTER,

Commissioner of Public Works:

Total area and length.....	741,580	18.124

The force employed upon the works under the direction of this Bureau on April 1, 1875, was 1,624 men and teams. The present force is 2,118 men and teams.

Respectfully,

M. A. KELLOGG,

Engineer-in-Chief,

Bureau of Construction of Roads and Avenues.

DEPARTMENT OF PUBLIC WORKS,
CONTRACT CLERK'S OFFICE, ROOM 27, CITY HALL,
NEW YORK, July 19, 1875.

Hon. FITZ JOHN PORTER,

Commissioner of Public Works:

SIR—In obedience to your request, I have the honor herewith to submit the following report explanatory of the various transactions of this office during the months of April, May, and June of the current year.

In this office articles of various kinds are contracted for and purchased upon the proper requisitions, signed by the different heads of Departments of the city government, in conformity with the provisions of the Charter, together with those emanating from all the bureaus of the Department of Public Works, and, as these are numerous, they demand constant and careful supervision.

Supplies of every nature required are now obtained at from thirty to fifty per cent. cheaper than the prices heretofore paid for the same commodities during the last several years.

The amount of material actually necessary for separate and distinct purposes has been exceedingly great this spring, but by the exercise of the utmost economy, and by careful use of the money at the disposal of the Department, I hope to secure a satisfactory result.

Since the first of April the Department has had seven public lettings, embracing forty-three different classes of public works, and thirty-one miscellaneous contracts have been awarded in addition, the majority of which are now in progress towards completion.

Yours, respectfully,

AUGUSTUS T. DOCHERTY,

Contract Clerk.

Contracts made during the Three Months ending June 30, 1875.

DATE OF CONTRACT.	NATURE AND LOCATION OF WORK.	CONTRACTOR.	SURETIES.	ESTIMATED COST.
April 27	Sewer in Water street, between Jefferson and Gouverneur streets	John H. McCabe, 1788 Lexington avenue	T. Duffy, 228 East 51st street E. C. Sheehy, 1505 Third avenue	$2,974 00

COMMUNICATION

FROM THE

COMMISSIONER OF PUBLIC WORKS

RELATIVE TO THE

CONSTRUCTION AND REPAIRS

OF

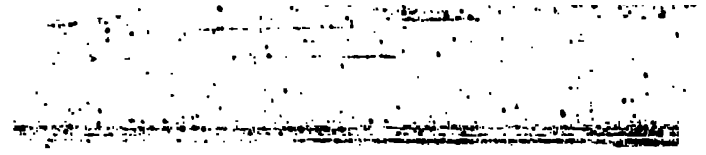
RECEIVING BASINS AND CULVERTS,

In Answer to Resolution of the Board.

IN BOARD OF ALDERMEN,
Sept. 30, 1875.

DOCUMENT No. 15.

NEW YORK:
MARTIN B. BROWN, PRINTER AND STATIONER,
201, 203 & 205 WILLIAM STREET.
1875.



DOCUMENT No. 15.

BOARD OF ALDERMEN,

SEPTEMBER 30, 1875.

The following communication from the Commissioner of Public Works, in answer to resolution of the Board, calling for certain information relative to the construction of receiving-basins and culverts, was received and ordered to be printed in document form.

FRANCIS J. TWOMEY,
Clerk.

DEPARTMENT OF PUBLIC WORKS,
COMMISSIONER'S OFFICE, ROOM 19, CITY HALL,
NEW YORK, September 30, 1875.

To the Honorable the Board of Aldermen of the City of New York:

GENTLEMEN—In reply to the resolution adopted by your Honorable Board on Thursday last, relative to the construction and repairs of receiving-basins and culverts during the past three

years, I have the honor to submit the annexed Schedule "A," showing the number of basins and culverts constructed, the cost of each, and by whom the work was done—and Schedule "B," showing the cost of repairing basins and culverts, the location of the same, and by whom the work was done, as far as returns are received.

The cost of constructing basins and culverts, as shown in Schedule "A," is assessed upon the property benefited, and the cost of repairs, as shown in Schedule "B," is paid out of the appropriations made for that purpose.

Very respectfully,

FITZ JOHN PORTER,

Commissioner of Public Works.

SCHEDULE "A."

Statement of Receiving Basins and Culverts built by the Bureau of Sewers, from September 23, 1872, to September 23, 1875.

I.—BASINS OF ORDINARY PATTERN, WITH AN AVERAGE LENGTH OF CULVERTS, AND BUILT IN EARTH EXCAVATION.

COMMUNICATION

FROM

HIS HONOR THE MAYOR,

TRANSMITTING REPORT OF

MESSRS. GEO. H. ANDREWS, WILSON G. HUNT, AND ISAAC SHERMAN,

A COMMITTEE APPOINTED TO ATTEND THE MEETING OF THE

STATE BOARD OF EQUALIZATION.

IN BOARD OF ALDERMEN,
Oct. 14, 1875.

DOCUMENT No. 16.

NEW YORK:
MARTIN B. BROWN, PRINTER AND STATIONER,
201, 203 & 205 WILLIAM STREET.

1875

DOCUMENT No. 16.

BOARD OF ALDERMEN,

OCTOBER 14, 1875.

The following message was received from his Honor the Mayor, transmitting report of Committee appointed to attend a meeting of the State Board of Equalization. On motion, five hundred copies of the message and accompanying report were ordered printed in document form.

FRANCIS J. TWOMEY,
Clerk.

EXECUTIVE DEPARTMENT, CITY HALL,
NEW YORK, October 7, 1875.

To the Honorable the Common Council:

GENTLEMEN—I herewith transmit for your information and consideration the report made by Messrs. George H. Andrews, Wilson G. Hunt, and Isaac Sherman, heretofore appointed a Committee "to attend the meeting of the State Board of Equalization, with a view of protecting the interests of this city, and of securing a more equitable distribution of the public burden than has been accorded heretofore."

The report tells its own story so exhaustively as to make it unnecessary for me to discuss here the matters referred to.

Whilst it is true that nothing which can be done by the local authorities can save us from payment of the amount of State tax assessed upon us for the next year, it is nevertheless proper that you should place upon record an emphatic protest against the outrage by which more than 55 per cent. of the tax assessed upon the entire State is to be extorted from this already overburdened city.

But for the vigorous discussion made by Messrs. Andrews, Hunt, and Sherman, as shown by the papers which accompany their report, it is probable that the city would have been mulcted in even a larger amount. And the members of the Committee deserve a formal resolution of thanks for the manner in which they performed their duties.

It is a striking comment upon this whole proceeding that, though assessed for more than half the entire amount of the State tax, the City of New York has not a single representative upon either the Board of State Assessors or the State Board of Equalization.

WM. H. WICKHAM,
Mayor.

REPORT

ON

STATE EQUALIZATION

To the Hon. Wm. H. Wickham,
Mayor:

Sir—The undersigned, appointed under the following resolution of the Board of Aldermen: "Resolved, That his Honor the Mayor be and is hereby requested to appoint a Committee or Commission of three members, of which Tax Commissioner Andrews shall be one, whose duty it shall be to attend the meeting of the State Board of Equalization, with a view of protecting the interests of this city and of securing a more equitable distribution of the public burden, than has been accorded heretofore," respectfully

REPORT:

That they attended the meeting of the State Board of Equalization, held at the office of the Secretary of State, in the State Hall, Albany, on the 7th of September. There were present Lieutenant-Governor Dorsheimer of Erie, Comptroller Hopkins of Erie, Treasurer Raines of Monroe, Attorney General Pratt of Onondaga, Secretary of State Willers of Seneca, State Assessors Fowler of Cayuga, Hadley of Seneca, and Briggs of Kings. Absent—State Engineer Sweet of Albany, and Speaker McGuire of Chemung.

The State Assessors announced that they were not prepared to submit tables of apportionment, and the Board requested

parties who desired to be heard to present their statements. Thereupon the undersigned submitted the memorial appended hereto, marked Exhibit "A," and desired that a reduction from the Tax Commissioners' valuation of $881,547,995 upon the real estate for 1874 of $100,000,000 should be made, that being, in their judgment, a less reduction than a fair apportionment would require.

The Board then adjourned to the 28th of September.

On that day the undersigned again presented themselves at the meeting of the Board, which was held at the same place; the same members being present as were present at the meeting on the 7th.

State Assessor Fowler of Cayuga presented a majority report, signed by himself and State Assessor Hadley of Seneca, recommending an apportionment according to a table which he submitted, which fixed the valuation of the real and personal property of the city at $1,205,531,580.

State Assessor Briggs presented a minority report, prepared by himself, which fixed the valuation of the real and personal property of the city at $1,163,557,700.

Thereupon the undersigned submitted to the Board a protest, a copy of which is appended hereto, marked Exhibit "B."

The Board then adjourned to the afternoon.

At the afternoon session the same members were present, with the addition of State Engineer Sweet.

Lieutenant-Governor Dorsheimer offered the following resolution:

Resolved, That the valuation of the real and personal property in the City of New York be as the same was fixed by the local board of Tax Commissioners, and that the report of the State Assessors be recommitted to them, with instructions to amend the same in accordance with this resolution.

Comptroller Hopkins, as a substitute for the above, moved the adoption of the report of the majority of the State Assessors.

Treasurer Raines called for the ayes and noes, which were taken as follows, upon this substitute offered by Comptroller Hopkins:

AYES—Secretary Willers, Comptroller Hopkins, Attorney-General Pratt, Engineer Sweet, Assessor Fowler, and Assessor Hadley—6.

NOES—Lieutenant-Governor Dorsheimer, Treasurer Raines, and Assessor Briggs—3.

And the substitute was carried, and the report of the majority of the State Assessors adopted.

The memorial and protest presented by the undersigned, and appended hereto, furnish, in a concise form, the grounds upon which the claims of the city were based, and render unnecessary any repetition in this portion of the report.

This decision of the majority of the State Board of Equalization is a monstrous violation of that principle of equity which should govern in the performance of the delicate and responsible duty imposed upon that Board. The just proportion of the State tax which should have been imposed upon the City of New York is $6,162,557. This sum is based upon the valuations in the various counties of the State, as presented in the tables appended hereto, marked Exhibit "B." The apportionment made by the State Board imposes a tax of $7,233,189, a sum $1,070,632 in excess of the demand of a just apportionment based upon the valuations of real estate by local assessors. But for the alleged neglect of the same official who moved in the State Board of Equalization to impose this unfair burden upon New York, the city's just share of the necessary State tax would have been only $5,727,445. So that error and unfairness exact from the city $1,505,744 more, under the apportionment just made, than necessity and equity demand. Tables demonstrating these statements are appended hereto, marked Exhibit "C."

It is to be remembered that the Legislature, in fixing the rate of taxation at six mills, did so with the belief that the product of that tax would be $13,015,847. But the increased valu-

ations of 1874, which ought to have been communicated to the Legislature, have raised the State levy to $14,206,680, or $1,190,833 in excess of the sum intended.

To enable the State Assessors to make their unjust apportionments of the assessments for 1873 and 1874, it became necessary for them to repudiate the full values, as determined by the local assessors, in every county in the State; and in every county, except New York and Kings, they assumed that these local assessors had overvalued the property of their friends, neighbors, and constituents. Now, who are these local assessors? They are men elected by those whose property they are to assess; themselves landowners, in most cases. This year they may assess, and next year they may be assessed by another. There is a keen competition among the towns that each may, by keeping down its valuations, diminish its share of the expenses of the county. These influences combined are surely potent enough to make it certain that the local assessor, when confronted by the State Assessors, will claim that he has used such a ratio in assessing as will keep down the full value, based upon that ratio, to the lowest possible figure. For instaece: A local assessor swears that he assessed the property at one-third of its value, and the assessment is $100,000; then it follows that the full value is $300,000. But the State Assessors discard this testimony, make some general inquiries of shrewd and interested parties, and "adopt" 50 per cent. as the ratio used in assessing, and fix the full value at $200,000.

A single instance, giving actual figures, will make this statement plain. The City of Kingston was assessed in 1873, as the local assessors swore, at 25 per cent., which made the full value $10,271,580. The State Assessors, on page 78 of their report, say that they found the assessment "by test from the assessment rolls" to be at a ratio of 25 per cent., which was equal to a full value of $10,271,580. Yet they "adopted" a ratio of 38 per cent., and fixed the full value at $6,766,274. The authorities of that city have issued a statement that the full value is $14,000,000, including $1,269,750 of personal estate.

It is remarkable that the State Assessors profess to have discovered such imbecility on the part of local assessors in every county of the State, except New York and Kings. It needs no argument to prove that no county could justly complain, if its full value were fixed at the sum based upon the sworn statements of the elected local officials of its several towns, as to the ratio adopted.

It is further claimed, however, by the State Assessors, that in many cases the local assessors merely copied the figures of the previous year, without examining the property, and that these figures, having been based upon a ratio of one-third, say 15 years ago, that the relation of value had changed since that time. But what then? Has the property in every county declined in actual value during the past 15 years? If it has, then the statement claims consideration. But if it has not, and all know that it has not, then it is mere trifling with the understanding to offer such a plea. Suppose the assessors' valuations in this city had not been changed in 15 years. Then the valuation of real estate, that of 1859, would show an assessment of $379,000,000 for 1874, whereas the actual assessment, upon Manhattan Island alone, for 1874, was $858,000,000.

By the method just explained the full value of the real estate in 58 counties was *reduced* in 1874 by the State Assessors $262,088,806 below the full value as fixed by the ratio sworn to by the local assessors, while in New York and Kings the State Assessors *increased* the full value of the real estate $613,920,103 over the full value as fixed by the local assessors. This is the solution of the question as to how a result, so at variance with every principle of equity, in the apportionment of the State tax this year, was arrived at. The foundation being faulty and false, everything erected upon it must partake of its character; must be also unfair, unjust, faulty, false.

The undersigned entered upon the duty with which you thought proper to charge them, with a grave sense of responsibility. Neither jealousy nor hostility toward any other portion of the State found any lodgment in their minds. Imbued with

the belief that the city had suffered great wrong in the previous apportionment, they labored earnestly to array such facts and figures as would carry conviction to any candid mind. They felt that the City of New York would rather suffer some wrong than do any wrong to any other interest. They made the moderate claim for $100,000,000 reduction. By a vote of six to three the State Board of Equalization added over $50,000,000. To Lieutenant-Governor Dorsheimer, Treasurer Raines and State Assessor Briggs the city is indebted for a careful consideration of its claims, and an earnest protest against the wrong which was done.

The character of the oppressive apportionment just made is illustrated by the following figures:

COUNTY.	Assessment upon Real Estate, fixed by Local Assessors in 1853, upon which State Tax was paid.	Assessment upon Real Estate, fixed by State Assessors for 1874, upon which State Tax is to be paid.	Decrease in Twenty-one Years.
Cayuga	$17,681,138 00	$16,184,374 00	$1,496,764
Greene	6,756,599 00	6,116,390 00	640,209
Jefferson	15,687,830 00	14,593,165 00	1,094,665
Lewis	4,937,508 00	3,263,901 00	1,673,607
Livingston	15,516,750 00	12,882,962 00	2,633,788
Niagara	16,096,817 00	14,539,977 00	1,556,840
Ontario	18,147,613 00	16,617,396 00	1,530,217
Orleans	10,089,310 00	9,525,413 00	563,897
Schoharie	6,518,683 00	4,859,805 00	1,658,878
Seneca	9,701,274 00	9,016,578 00	684,696
Sullivan	4,266,602 00	3,122,600 00	1,144,002
Washington	13,136,414 00	12,348,270 00	788,144
Wyoming	8,363,758 00	7,723,377 00	640,381
Yates	7,836,966 00	7,285,778 00	551,188

For details of all the counties see table appended hereto marked Exhibit "D." This statement alone suffices to condemn the apportionment as utterly unworthy of confidence or credit.

The real estate in the Counties of Cayuga, Chautauqua, Delaware, Schoharie, and Schuyler is fixed by the State Assessors at a lower valuation than in the previous year.

The tax imposed this year will be paid by the city next year and will be felt as a heavy burden. Thereafter, unless unfore-

een events occur, the volume of the State tax will be largely educed, and it will be scarcely practicable for any Board of Equalization, however untrue to its title, so to distort facts and igures, as to impose a sum of taxation anything like so large as 7,000,000. But with a State Board constituted as at present, nd subjected to similar influences, at a like season of the year, here can be but little hope in the future.

If the concurrent testimony of several thousand local fficials, directly interested in giving such evidence as will reduce ie value of the property of their constituents to a minimum, is) be rejected by the State Board, and arbitrary and capricious aluations, materially lower, adopted, what testimony can the ity hope to adduce which would obtain credit with that Board?

The system is defective, the remedy must be radical; but in ie discussion of that remedy the undersigned would transcend ie limit to which their appointment assigned them.

With thanks, for the courtesy with which you have met them i council, the undersigned respectfully surrender their trust.

GEO. H. ANDREWS,
WILSON G. HUNT,
ISAAC SHERMAN.

New York, October 1, 1875.

Exhibit A.

MEMORIAL

ON BEHALF OF THE

CITY OF NEW YORK.

To the State Board of Equalization:

The undersigned, appointed by the Mayor of the City of New York, in pursuance of a resolution passed by the Board of Aldermen, who are by law the Supervisors of the County of New York, are charged with "the duty of attending the meeting "of the State Board of Equalization, with a view of protecting "the interests of the city, and of securing a more equitable dis-"tribution of the public burden than has been accorded hereto-"fore," respectfully represent:

That for several years the impression has prevailed among tax-payers in the City of New York, that owing to inequalities in assessments in the various counties of the State, an undue proportion of the State tax was borne by the city. That impression has ripened into conviction, growing out of a state of facts which are herewith presented.

It appears that during the past ten years the proportion of the State tax paid by the city and by the rest of the State, respectively, has been as follows:

TABLE *showing the sum of State Tax paid by the City of New York and by the rest of the State for the past ten years, with the amount per capita for each year, based upon the last State Census of* 1865 :

YEAR.	Quota of State Tax for the City of New York.	Quota of State Tax for rest of State.	For each Inhabitant of the City.	For each Inhabitant of rest of State.
1866	$2,902,849	$4,328,127	$3 99	$1 39
1867	3,890,544	4,626,920	5 35	1 49
1868	5,564,426	7,082,792	7 66	2 29
1869	4,486,920	5,756,397	6 18	1 85
1870	4,904,501	5,558,678	6 75	1 80
1871	6,741,956	7,544,020	9 28	2 42
1872	5,745,049	5,868,894	7 90	1 89
1873	9,761,752	9,828,130	13 43	3 17
1874	7,673,481	7,127,422	10 59	2 29
1875	8,012,386	7,715,096	11 03	2 48

When it is considered that about one-half the population of the city is in such narrow circumstances as to occupy tenement houses, it will be conceded that the tax *per capita*, for such remote and incidental advantages as the State affords in return, is extremely onerous. The undersigned, however, do not rest upon this condition of affairs as affording, in itself alone, a sufficient reason for the action they solicit at your hands. The apportionment is based upon property and not upon population.

But it is important that due regard should be had to the proportionate valuation in distributing the proportionate taxation. From a table which follows, it will be seen that, of the sixty counties, thirty-two (printed in italic) declined in assessed value in twenty years, that is, from 1853 to 1873, while ten others, comprising the important counties of Allegany, Chenango, Cortland, Dutchess, Oneida, Orange, Rensselaer, Richmond, Schenectady, and Warren, remained about stationary during the same period. In some of the counties in which the valuation is less in 1873 than in 1853, it will be observed that the State Board of Equalization further reduced the valuations of 1873 for the taxes of 1874. These counties are Allegany, Cayuga, Genesee, Ontario, Orleans, Seneca, Steuben, Washington, Wyoming, and Yates.

1853 AND 1873.

Table showing the assessed value of Real Estate in each County, for 1853 *and* 1873 *and the Additions and Reductions made by the Board of Equalization in* 1874.

COUNTIES.	Assessed value of real estate, 1853.	Assessed value of real estate, 1873.	Amount added to assessed value of real estate, 1873.	Amount deducted from assessed value of real estate.
Albany	$26,862,329	$44,188,851	.....	$1,027,648
Allegany	8,597,957	8,117,931	.....	188,790
Broome	6,416,433	7,139,056	$1,679,777	.....
Cattaraugus	8,085,722	6,959,838	1,809,557	.....

* New County, formed in 1854, from Chemung, Steuben, and Tompkins Counties. The territory formed by these three counties and the new County of Schuyler is assessed $5,810,781 less in 1873 than in 1853.

By an official table, now before your Board, it appears that several of the counties have largely increased their valuations of real estate in 1874 over those of 1873, and a comparison of those two years only would operate to the disadvantage of New York, which has gradually increased its valuations year by year, not shrinking from that duty when the State tax was at its heaviest figures. But to obtain a view of the just relations of the valuations in the several counties, it is necessary to look far beyond the valuations of the previous year. By a table herewith given the comparative increase from 1853 to 1874 is exhibited, by which it will be seen that New York has increased its valuations, during that time, in a larger ratio, with a single exception, than any county in the State.

TABLE *showing the Increased and Decreased Percentage of Valuations from* 1853 *to* 1874.

* Schuyler County, formed in 1854 from Chemung, Steuben, and Tompkins Counties. This territory was assessed $35,319,223 in 1853, and $58,945,208 in 1874. Increase, 66.7 per cent.

† This is exclusive of $9,578,230, being the assessed valuation in 1873 of the three towns annexed from Westchester County.

‡ This includes the sum of $9,578,230, which was the assessed valuation in 1873 of the three towns annexed to New York City.

An enormous advantage has been gained by those counties which kept their valuations at 22 to 40 per cent., while the State tax ranged from 7⅞ mills to 9⅝ mills, during which period the proportion of State tax born by the city *increased* from 40.1 per cent. in 1866 to 50.9 per cent. in 1875, while the proportion borne by the rest of the State *decreased* from 59.8 per cent. in 866 to 49 per cent. in 1875. These facts are important elements to be considered in apportioning the tax for this year.

In determining the relation of assessment to value, the undersigned desire to call the attention of your Board to the following statement: In the report of the State Assessors for 1874, beginning at page 23, there is given a tabular statement, the first column of which is headed "Percentage sworn to as the rate used by local assessors." Accepting the figures in this column as the nearest to, and indeed the only reliable estimate, made, as it is, by parties who ought to know the facts, and who are interested in making a favorable presentation of such facts, that is, to name a percentage as high as may be consistent with truth; and the following table summarizes the results, in those counties which materially increased their assessed valuations of real estate in 1874:

COUNTIES.	Average percentage sworn to as the rate used by Local Assessors in 1873.	Percentage used in 1874, calculated upon that sworn to in 1873.	COUNTIES.	Average percentage sworn to as the rate used by Local Assessors in 1873.	Percentage used in 1874, calculated upon that sworn to in 1873.

The third column of the tabular statement referred to is headed "Percentage adopted by the State Assessors." Out of 870 towns of which the ratio used by the local assessors is given, in 754 towns a ratio from 1 to 30 per cent. higher is adopted by the State Assessors; that is to say, that in 754 towns the local assessors valued the lands of their constituents too high as a basis upon which to adjust the ratio of their assessments. In the City of New York the Tax Commissioners claim to have used the rate of 60 per cent. in assessing, while that "adopted" by the State Assessors is only 43 per cent. Then it stands thus: The ratio sworn to, as used by local assessors in 754 towns, is repudiated, and a ratio materially higher adopted by the State Assessors; while in New York the ratio of the Tax Commissioners is rejected, and one 17 per cent. lower adopted by the State Assessors. As this "adopted" ratio is the ratio used in apportioning the State tax, the result is to benefit largely those sections where the ratio is increased, at the expense of the city, where the ratio is decreased. To make it plainly understood, it may be thus stated: The local Assessors swear that their assessments are 25 per cent. of the actual value. The State Assessors say, in effect, "not so; "your assessments are 50 per cent. of the actual value, and as "the average in the State is 40 per cent., your property is 10 "per cent. above that average, and consequently the difference "between 40 and 50 per cent. shall be taken off your prop- "erty and placed upon other property in the State, which we "deem to be assessed at less than 40 per cent." The entire question of the relative ratios of assessments is one which involves estimate, discretion, judgment. A literal, mathematical demonstration is rarely possible. To allege that the State Assessors have erred in their estimate of the relative ratios, is to allege that they are human, and is in no sense to impugn their integrity or veracity; while their industry and devotion to their duties elicit the praise of those who have suffered from their errors of judgment. The undersigned are informed that prior

to the adoption of the ratio of 43 per cent. by the State Assessors, the Tax Commissioners submitted to those officers a schedule including nearly five hundred pieces of property scattered in all the wards, which had been sold or were for sale at prices upon which the assessments ranged from 56 to 103 per cent., averaging 68.3 per cent., and of others in one suburban ward (the Twelfth), ranging from 45 to 60 per cent., averaging 51 per cent. But the total assessments in the Twelfth Ward were only 7.7 per cent. of those in the entire city. The fittest practical commentary on these ratios adopted by the State Assessors, may be found in the following extract from the Report of the New York City Tax Commissioners for 1875, page 19:

"In 1873, the State Board added to the assessment of the "entire County of Westchester $2,677,723, in order to equalize "the assessments in that county with those of New York. In "1874, upon the annexation of three of the towns of Westchester "County, the Commissioners found it necessary, in order to bring "the valuations in those towns to something like a fair proportion "with the assessments in other portions of the city, to add "$13,468,847 to that same assessment for 1873. That is to say "that, assuming that the rest of that county was assessed in the "same proportion in 1873 as the three annexed towns were, the "valuation of the county should have been increased $76,334,957, "instead of only $2,677,723."

To heighten the absurdity of the adoption of such ratios, it may be added that on page 82 of the Report of the State Assessors,

the ratio	of	37½	is "adopted"	for	Kingsbridge,
"	"	33⅓	"	"	Morrisania,
"	"	35	"	"	West Farms,

as the ratios at which these towns were assessed in 1873. When annexed to New York City, in 1874, and the assessment was raised upon these towns from $9,578,230 to $23,047,540, by the Tax Commissioners of the city, then the same page of the

report, in a note, states that, "these towns are now annexed to New York and assessed 38 per cent. of full value." That is to say, that $9,578,230 is 35⅛ per cent. out of the city, and that $23,047,540 is 38 per cent. on the same property, when annexed to the city: whereas, the rule of proportion makes the latter sum equal to 84.9 per cent. This is one of the rare instances where mathematical demonstration is possible.

Such remarkable discrepancies as these have brought the undersigned before your Board, with a belief on the part of the tax-payers of the city, that a presentation of such facts would insure a more equitable distribution of the burden of State taxation.

It is not deemed necessary to give special prominence to the fact that during 1874 real estate generally declined in value. If that element be taken into account, then the assessed value of city property must be placed at not less than 85 per cent. of current values. Indeed, the undersigned are informed that in many instances sales have been made at public auction at prices less than the assessed valuations. It may well be doubted whether, if the Tax Commissioners increased valuations generally, they would not incur the risk of overrunning actual values.

The attention of your Board is respectfully requested to another grievance of which the city justly complains. Since 1853, the assessments for personal property upon which the tax remains uncollected, amount to $473,294,774, upon all of which the State tax has been paid. So long ago as in 1856 and 1857, the deficiency in each year was $20,000,000, and in later years, since an irredeemable paper currency has added nominally to the volume of business, and at the same time augmented its hazards, the sum of the deficiencies has largely increased, so that, in 1872, it exceeded $51,000,000. During the last ten years, the amount of tax paid to the State by the city, upon uncollected assessments upon personal property, is $2,149,580. It would seem but reasonable that the State should reimburse the city the

amount of taxes paid upon assessments made in good faith, but upon which the tax proved uncollectable. It is probably, however, beyond the power of your Board to deal with this question, so far as it affects the assessments of former years. But it is only just that the assessments upon personal property for 1874, upon which the tax remains uncollected, amounting to $37,210,708, should be taken into account in your distribution of assessments, in addition to the deduction you may make upon the assessments upon real estate.

These deficiencies have arisen from the efforts made to enforce the laws for assessing personal property with fidelity; while the vicissitudes of business, the shifting character of the population, and the setting aside by the courts of assessments supposed to be legal when made, render it impossible to collect a large proportion of such taxes.

It has not escaped the observation of the undersigned that while the assessments upon personal property in New York have declined in 1874, that in some other counties they have materially increased. Where the law had been enforced with any degree of rigor, it was impossible that the revulsion of 1873 could pass without leaving its traces in diminished assessments for 1874; but where the law had not been enforced prior to 1874, it would be easy to show an increase for that year. Owners of personal property, feeling confident they would not be assessed, would be lulled into security—perhaps securities would be the better word—which would subject them to assessment for one year at least, until their investments could be changed into some form not assessable. But it has been found that a persistent enforcement of the law keeps the tax-payer on the alert, to so order his affairs that his investments shall be beyond the reach of the law and its administrators.

In several of the counties which show an increased assessment of personal property in 1874 over 1873, it will be found that the assessments for 1873 were far less than in 1853, and in some of them, even the increase in 1874 does not bring them up to the standard of 1853.

The undersigned have been content to make their statement before your Board in the form of facts, unincumbered by argument, and upon this presentation of facts they rely, to secure at your hands an equitable apportionment for the city they represent. They may be pardoned for referring to the incident, that while paying one half of the State tax, the City of New York has no direct representative in your Board. This consideration has doubtless influenced her Legislature in delegating the undersigned to appear before you. But, although the city has no voice in your council, the claims of justice and equity will doubtless receive such consideration at your hands as will do much to reconcile her to the exclusion.

Respectfully submitted,

GEO. H. ANDREWS,
WILSON G. HUNT,
ISAAC SHERMAN,
On behalf of the City of New York.

New York, September, 1875.

Exhibit B.

PROTEST

ON BEHALF OF THE

CITY OF NEW YORK

To the State Board of Equalization:

The undersigned, appointed by the Mayor of the City of New York, at the request of the Board of Aldermen thereof, to represent the interests of that city before the State Board of Equalization, respectfully

PROTEST

against the adoption of the recommendation of the Board of State Assessors by the State Board of Equalization, for the following reasons:

1. Because the effect will be to impose upon the city an unfair and unequal share of the burden of the State tax.

2. Because it is a continuation of the unjust discrimination against the city, which has increased the payment *per capita* toward the State tax from $3.99, in 1866, to $11.03, in 1875, by each inhabitant of the city; while outside of the city the increase has been only from $1.39, in 1866, to $2.48, in 1875.

3. Because the apportionment, as recommended, assumes that in most of the towns and cities the local assessors, to exaggerate the full value, have sworn to a lower ratio of assessment than that actually used, while in the city of New York it is assumed that the Tax Commissioners, to diminish the full value, claim to have used a ratio higher than that actually employed, whereby the city is made to suffer injustice.

4. Because the apportionment recommended, repudiates the evidence furnished by the State Assessors, that the assessments for 1874, in the city of New York, were upon a ratio of not less than 85 per cent., which is established by the fact that, the assessment upon the three annexed towns of Westchester County for 1873, of $9,000,000, was declared by the State Assessors to be at the ratio of 35⅓ per cent., and the assessment upon the same property, when annexed, in 1874, was raised to $23,000,000, in order to equalize it with the assessments upon the rest of the city.

5. Because the apportionment recommended ignores the fact, that in a period of twenty-one years, the valuations in the city of New York were increased more than 195 per cent., being in a greater proportion than in any other county, except in the county of Kings.

6. Because the apportionment recommended is based, substantially, upon the table found upon page 21 of the Report of the State Assessors for 1874 (modified in some instances by a new ratio adopted in certain counties), which professes to give the full value of the real estate in each county. To obtain the results set forth in this table the concurrent testimony of several thousand local assessors as to the ratios used by them in assessing is rejected, and the ratios arbitrarily "adopted" by the

State Assessors substituted therefor. Although the apportionment of the State tax last year was based upon this table, it has no substantial value except to demonstrate the mistakes of the State Assessors. By their table the full value of the real estate outside of the city of New York was declared to be $2,233,309,817, in addition to $126,161,312 of personal property; and in the city of New York, $1,935,021,540, in addition to $292,447,673 of personal property. Upon this $8,012,386 of State tax was allotted to the city, and $7,715,096 to the rest of the State. Whereas the full value of the real estate, as determined by the ratios declared by the local Assessors to have been used by them was, outside of the city of New York, $2,422,011,094, and in the city of New York, $1,394,488,966. Upon this basis the portion of State tax allotted to the city of New York should have been $4,637,664 upon the real estate and $2,120,246 upon the personal estate, a total of $6,757,-910; and to the rest of the State, $8,969,572 upon the real and personal estates. There was thus unjustly imposed upon the city of New York **$1,254,476** in excess of an equitable share of the State tax last year. This tax represents an excess of valuation in the apportionment of over $173,000,000. It would be a work of many days to analyze the assessments for 1874 by towns, if they were accessible, and the undersigned can only, by exposing the injustice effected in 1874, in regard to the assessments of 1873, strengthen this, their protest, against the further use of a system which has worked such enormous wrong to the interests they represent. (See tables appended.)

7. Because for the first time in the history of the State the valuation of personal property is proposed to be admitted as an element in the apportionment—an element which,

if heretofore admitted, would have largely benefited the city of New York, but, if now introduced, would be to the advantage of several counties which have allowed their assessments upon personal property to decline from ten to fifty per cent. during the past twenty-one years, thereby casting upon the city of New York during that period a portion of their share of the general burden, as the large increase of assessments upon that class of property in those counties for 1874, a year of depression, proves that such property might have heretofore been assessed by a rigid appraisement. During the same period the assessments upon personal property in the city increased from $98,000,000, in 1852, to $272,000,000, in 1874.

8. Because the introduction of the relative ratios of the assessments upon personal property brings into the question of equalization a problem absolutely insoluble, the defects in the laws, and the various constitutional and other exemptions, rendering utterly worthless any data upon which a computation may be attempted, although it is conceded that in some instances it may be demonstrated that the laws for assessing personal property are treated as a nullity, as, for example, where the aggregate assessment upon personal property in a wealthy county is less than the par value of the bank capital in that county.

9. Because the adoption of the apportionment recommended would give additional color to the allegation, for which the apportionment made in 1874 furnished the ground, that the representation of a county in the Board of State Assessors resulted in a material advantage to that county in the apportionment of the State tax. As, for instance, in the county of Cayuga, where the assessment upon real estate declined from $17,681,138, in 1853, to $17,046,521, in 1873, a decrease of $534,617, notwithstanding an increase in population and in wealth, the State Assessors ad-

vised a reduction from the valuation of 1873 of $775,817. In Seneca County, where the assessment upon real estate declined from $9,701,274, in 1853, to $9,248,430, in 1873, a decrease of $546,844, in the face of an increase in population and wealth, the State Assessors advised a reduction from the valuation of 1873 of $983,876. And this while 10 other rural counties, not more favorably situated, but which increased their valuations in 1873 over those of 1853, had imposed upon them an additional burden, by the advice of the State Assessors, of from $500,000 to $3,500,000 each in assessment. In the county of Kings, where the ratio of assessment claimed by the local assessors was not higher than that claimed to have been used by the city of New York, the reduction advised by the State Assessors was $29,847,563, or 14 per cent., while for the city of New York the reduction was only $23,984,333, or $2\frac{1}{10}$ per cent.

0. Because no government can retain the affection and confidence, or even the respect, of the people, where taxation is unequal and inequitable. The apportionment proposed will be an arbitrary exercise of power to oppress and harass a large portion of the people of this State, who willingly and cheerfully bore the burdens imposed upon them, however heavy, while those burdens seemed to be adjusted with an impartial purpose; but, in their name, and in their behalf, the undersigned solemnly protest against the proposed unequal distribution of the State tax, as a gross violation of that justice and equity which should underlie the administration of the fiscal affairs of a free people.

GEO. H. ANDREWS,
WILSON G. HUNT,
ISAAC SHERMAN,
On behalf of the City of New York.

ANY, September 28, 1875.

How the WRONG is Proved.

TABLE *showing the full value of Real Estate, as Estimated by the State Assessors in* 1874, *upon the Ratios of Assessment "Adopted" by them for* 1873; *and the full value as obtained from the Ratios declared by the Local Assessors to have been used by them for* 1873.

Total	$4,168,331,357 00	$3,816,560,960 00

* No report from Local Assessors, and the valuation of the State Assessors is used.

In those towns where the local assessors made no statement, the ratios "adopted" by the State Assessors are used.

Total deductions in foregoing table, in all the counties except New York and Kings, from the local assessors' full valuation....	$262,088,806 00
Addition to local assessors' valuations in Kings county.....	73,387,529 00
Addition to local assessors' valuations in New York City.....	540,532,574 00
Addition to New York and Kings.....	$613,920,103 00

Table showing the method used in determining the sum unjustly extorted from the City of New York by the apportionment of 1874:

Equalization on real estate in New York City by Board of Equalization in 1874 on values of 1873.....	$812,709,047 00
Apportionment should have been in 1874 on city values of real estate in 1873 according to local assessors' estimate of full value...	639,677,790 00
Excessive and unjust valuations by Board of Equalization in 1874....	$173,031,257 00

Which, at 7¼ mills, amounts to $1,254,476 of unjust State taxation arbitrarily extorted from the city by the apportionment of 1874.

Exhibit "C."

Table showing the equitable sum to have been raised by the City of New York under the law fixing the rate of tax at six mills:

The total State tax to be raised, at six mills, on the total valuation in 1874, $2,367,780,102	$14,206,680 00
Deduct tax on personal property, $407,437,399, at six mills	2,444,624 00
Leaves to be raised on real estate	$11,762,056 00
The proportion of which to be raised by the City of New York upon its full value, as fixed by the assessment for 1873, of $1,394,488,966	$4,297,670 00
Add for annexed towns, assuming them to have been assessed at 60 per cent. for $23,000,000, *$38,333,333, at six mills	230,000 00
Proportion of the City of New York	$4,527,670 00
Equal to an assessment of $754,611,677, which would produce, at six mills, the above sum of	4,527,670 00
Assessors' valuation in New York City for 1874	$881,547,995 00
Equalized valuation should be	754,611,667 00
Amount which should be deducted from Assessors' valuation	$126,936,328 00

To the above tax on real estate of	$4,527,670 00
Add tax on personal estate, assessed at $272,-481,181	1,634,887 00
Share of State tax for New York City.....	$6,162,557 00
Amount actually imposed.....	7,233,189 00
Excess over equitable sum.....	$1,070,632 00

Table showing the equitable sum to have been raised by the City of New York, according to the intention of the Legislature as to the product of the State tax:

The total State tax intended by the Legislature to have been raised, at six mills, on the total valuation in 1874, $2,169,307,873...	$13,015,847 00
Deduct tax on personal property, $407,437,399, at six mills.....	2,444,624 00
Leaves to have been raised upon the real estate.....	$10,571,223 00
The proportion of which to have been raised by the City of New York upon its full value, as ascertained by the assessment for 1873, of $1,394,488,966.....	$3,862,558 00
Add for annexed towns, assuming them to have been assessed at 60 per cent., for $23,000,-000, *$38,333,333, at six mills.....	230,000 00
Proportion of City of New York.....	$4,092,558 00

* This is much larger than the true sum.

Equal to an assessment of $682,093,000, which would produce, at six mills, the above sum of	$4,092,558 00
Assessors valuation in New York City for 1874	$881,547,995 00
Equalized valuation should have been	682,093,000 00
Amount which should have been deducted from Assessors' valuation	$199,454,995 00
To the above tax on real estate of	$4,092,558 00
Add tax on personal estate, assessed at $272,481,181	1,634,887 00
Share of State tax for New York City would have been	$5,727,445 00
Amount actually imposed	7,233,189 00
Excess over equitable sum, according to intention of Legislature	$1,505,744 00

Exhibit D.

TABLE *showing the Valuation of Real Estate in* 1853, *by Local Assessors, upon which the State Tax was paid; and the Valuations by the State Assessors for* 1874, *as fixed in* 1875, *upon which the State Tax is to be paid; with the Increase and Decrease in each County.*

COMMUNICATION

FROM

THE COMPTROLLER

TRANSMITTING

Report of the Auditor of Accounts,

BEING DETAIL OF ALL

WARRANTS DRAWN ON THE CITY CHAMBERLAIN

FOR THE

QUARTER ENDING MARCH 31, 1875.

Board of Aldermen,

DECEMBER 2, 1875.

DOCUMENT No. 17.

NEW YORK:
MARTIN B. BROWN, PRINTER AND STATIONER,
Nos. 201, 203 & 205 WILLIAM STREET.

1876.

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, November, 1875.

Hon. WM. H. WICKHAM,
Mayor:

SIR—I have the honor to transmit herewith a detailed statement of all accounts audited and allowed by this Department, on account of the City of New York, and for which warrants have been drawn upon the Chamberlain, for the quarter ending March 31, 1875.

Very respectfully,

ANDREW H. GREEN,
Comptroller.

CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, November 19, 1875.

Hon. ANDREW H. GREEN,
Comptroller:

SIR—Herewith is transmitted a statement of all accounts audited and allowed on City and Trust Accounts, for which warrants upon the Chamberlain have been drawn, during the quarter ending March 31, 1875.

Very respectfully,

DANIEL JACKSON,
Auditor of Accounts.

ANNUAL STATEMENT

OF THE

ATTORNEY TO THE CORPORATION

OF THE

TITLES OF ALL ACTIONS

WHICH HE IS AUTHORIZED TO PROSECUTE ON BEHALF OF THE CORPORATION, ETC.

IN BOARD OF ALDERMEN,
December 23, 1875.

DOCUMENT No. 18.

NEW YORK:
MARTIN B. BROWN, PRINTER AND STATIONER,
Nos. 201, 203 & 205 WILLIAM STREET.
1876.

DOCUMENT No. 18.

BOARD OF ALDERMEN,

DECEMBER 28, 1875.

The following statement of the Attorney to the Corporation of the titles of all actions which he is authorized to prosecute on behalf of the Corporation, was received and ordered to be printed in document form.

FRANCIS J. TWOMEY,
Clerk.

LAW DEPARTMENT OF THE CITY OF NEW YORK,
OFFICE OF THE ATTORNEY TO THE CORPORATION,
NOS. 115 AND 117 NASSAU STREET,
NEW YORK, December 20, 1875.

To the Common Council of the City of New York:

In compliance with the ordinance of the Common Council (Revised Ordinances of 1866, page 143, section 307), I herewith transmit the annual statement of the Attorney to the Corporation of the City of New York, of the titles of all actions which he is authorized, by section 20 of chapter 5, to prosecute on behalf of the corporation now pending and undetermined, with the state thereof and information in respect thereto.

Respectfully,

WILLIAM A. BOYD,
Attorney to the Corporation.

LAW DEPARTMENT OF THE CITY OF NEW YORK,
OFFICE OF THE ATTORNEY TO THE CORPORATION,
NOS. 115 AND 117 NASSAU STREET,
NEW YORK, December 20, 1875.

Annual Statement of the Attorney to the Corporation of the City of New York of the titles of all actions which he is authorized, by section 20 of chapter 5 of the Revised Ordinances of 1866, to prosecute on behalf of the Corporation, now pending and undetermined, with the state thereof and information in respect thereto, presented to the Common Council in pursuance of chapter 5, section 30, of the Revised Ordinances of 1866.

SEVENTH DISTRICT COURT.
